

# Additional Order

Until the order status is changed to "Received at Warehouse", the customer is able to supplement the chosen order.

When the customer adds a product to the shopping cart and goes through the ordering process, he/she may choose the order he/she wants to add the product to:

If the customer chooses an order from the available order list, the product is added to that order. The new product line appears in Agent's admin area, and its status changes to "Awaiting Payment". The statuses of the processed orders are left unchanged.

The further processing of the specified order (the overall order status changes to «Awaiting Payment») is standard.

If the customer's order is transferred to «Received at Warehouse» or any other status, following it, the customer is unable to supplement the order.
