Module for website flexible pricing system. It allows setting financial strategies for website and adjusting to seasonal market fluctuations, making profitable offers of different goods categories for customers.

Location in admin panel: Pricing > Banker

The screenshot shows the 'Banker' module interface. On the left, a sidebar contains menu items: Orders, Pricing (highlighted with a red box), Promotion, Contents, Catalog, Users, Configuration, Reports, and Plugins. The main area has tabs for Currency, Price, Discounts, and Banker (highlighted with a red box). Below the tabs, the 'Banker module' section is visible, featuring a 'Price groups' table and an 'Add price group' button.

Name	Description	Pricing strategy	Intervals	Categories	Provider of items	Action
★ Simple Taobao	Default simple price formation	AdvancedDeliveryByQuantityIfNoWeight	Limit0		Taobao	⚙️
All groups	All groups	AdvancedDeliveryByQuantityIfNoWeight	Limit0 Margin:25%		Taobao	⚙️
★ Simple Warehouse	Default simple price formation	AdvancedDeliveryByQuantityIfNoWeight	Limit0 Margin:40%		Warehouse	⚙️

## Description

"Banker" Module is flexible pricing. Read more about module price and connection on the website: <http://en.otcommerce.com/prices-and-promo>

"Top" and "Connect" Box versions include this module by default.

Read more about detailed description for business benefits here: [Банкир \(описание модуля\)](#)

"Banker" Module settings consist of two main steps:

1. Add price group.
2. Bind category to price group.

## Add price group

It is possible to add price group for:

1. For all goods categories.
2. For several goods categories.
3. For single goods category.

That is, it is possible to create unlimited number of price groups with different conditions for delivery calculation and margin percent to goods price.

Click "Add price group" in Banker tab to add price group:

The screenshot shows the 'Banker module' interface. At the top, there are tabs for 'Currency', 'Price', 'Discounts', and 'Banker'. Below the tabs, the 'Banker module' title is displayed. Underneath, the 'Price groups' section is visible, featuring a table with columns: Name, Description, Pricing strategy, Intervals, Categories, Provider of items, and Action. A red box highlights the 'Add price group' button located above the table.

Name	Description	Pricing strategy	Intervals	Categories	Provider of items	Action
★ Simple Taobao	Default simple price formation	AdvancedDeliveryByQuantityIfNoWeight	Limit:0		Taobao	
All groups	All groups	AdvancedDeliveryByQuantityIfNoWeight	Limit:0 Margin:25%		Taobao	
★ Simple Warehouse	Default simple price formation	AdvancedDeliveryByQuantityIfNoWeight	Limit:0 Margin:40%		Warehouse	
★ Simple Alibaba1688	Default simple price formation	ManyIntervals	Limit:0 Margin:0%		1688.com	

## General settings

Fill in "Price group name" field

The screenshot shows the 'Adding price group' form. At the top, there are tabs for 'Currency', 'Price', 'Discounts', and 'Banker'. Below the tabs, the 'Adding price group' title is displayed. The form contains several input fields: 'Price group name' (highlighted with a red box and containing 'Kids toys'), 'Description', 'Provider of items' (a dropdown menu with 'Taobao' selected), and 'Default group' (a checkbox). Below these fields is the 'Price intervals' section, which includes a table with columns: Interval CNY, Margin percent, Margin rate CNY, Delivery price for this group CNY, and Fixed margin for group CNY. The table has two rows: 'For all intervals' and 'Add price interval'. At the bottom of the form, there are 'Save' and 'Cancel' buttons.

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			<input type="text"/>	<input type="text"/>
Add price interval	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Fill in "Description" field:

[Pricing](#) > [Banker](#) > Adding price group

[Currency](#) [Price](#) [Discounts](#) [Banker](#)

## Adding price group

Price group name

Description

Provider of items

### Banker module

#### Price groups Add price group

	Name	Description	Pricing strategy	Intervals	Categories	Provider of items	Action
	Simple Taobao	Default simple price formation	AdvancedDeliveryByQuantityIfNoWeight	Limit:0		Taobao	
	All groups	All groups	AdvancedDeliveryByQuantityIfNoWeight	Limit:0 Margin:25%		Taobao	
★	Kids toys	Toys for children from 0 to 5 years	AdvancedDeliveryByQuantityIfNoWeight	Limit:0		Taobao	
★	Simple Warehouse	Default simple price formation	AdvancedDeliveryByQuantityIfNoWeight	Limit:0 Margin:40%		Warehouse	
★	Simple Alibaba1688	Default simple price formation	Many/Intervals	Limit:0 Margin:0%		1688.com	

## Price intervals

Pricing for goods of different price categories is set in "Intervals" block:

Price group name ? Kids toys
Description ? Toys for children from 0 to 5 years
Provider of items Taobao
Default group ? ☒

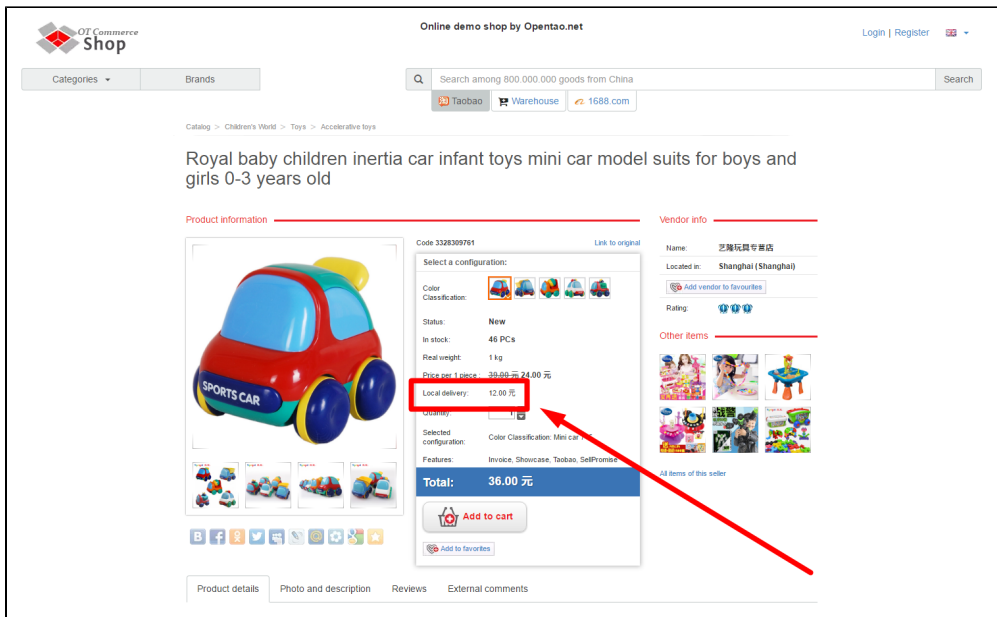

#### Price intervals

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals				0
<a href="#">Add price interval</a>				
0 -	0			
Complex settings for advanced users				

Save
Cancel

## Delivery

First, we set margin for Local delivery (delivery within China set by Vendor on trade provider website):

Set delivery value in "Delivery price for this group CNY" field. This value will be taken for **delivery price of 1 item**.

**Example:** we set 20 yuan in this field and delivery price will be the following:

- 1 item = 20 yuan
- 2 items = 40 yuan
- 10 items = 200 yuan

Set in yuan:

Home > Pricing > Banker > Editing price group

Currency Price Discounts Banker

### Editing price group

Price group name: Kids toys

Description: Toys for children from 0 to 5 years

Provider of items: Taobao

Default group: ☒

#### Price intervals

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20	0

[Add price interval](#)

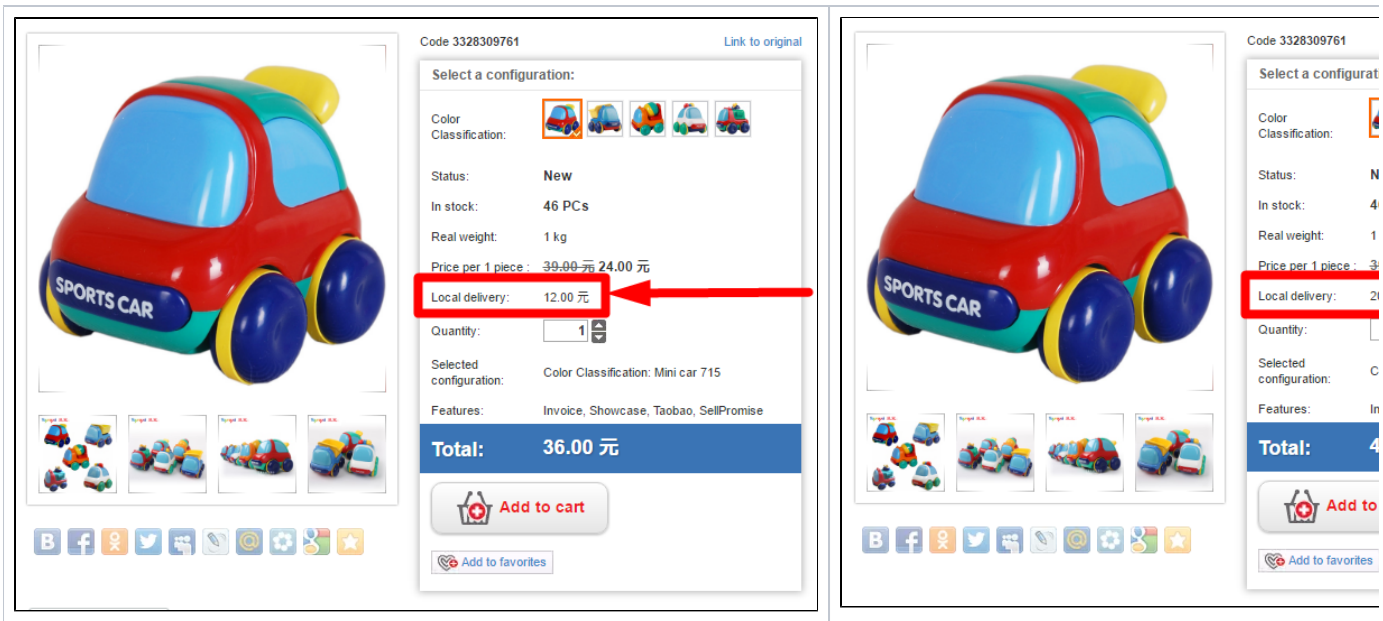

0 - 0

Complex settings for advanced users

Save Cancel

Compare:

Before (12 CNY )	After (20 CNY )
------------------	-----------------

Now we add value to "Fixed margin for group CNY" field. **This value is added to delivery price of any quantity of goods.**

**Example:** on the condition above, we know that delivery price of each item is 20 yuan. We get the following result if we set 10 yuan in "Fixed margin for group CNY" field:

1 item = 20 yuan + 10 yuan = 30 yuan

2 items = 2\*20 yuan + 10 yuan = 50 yuan

10 items = 10\*20 yuan + 10 yuan = 210 yuan

Set value in field:

🏠 > Pricing > Banker > Editing price group

Currency Price Discounts Banker

### Editing price group

Price group name: Kids toys

Description: Toys for children from 0 to 5 years

Provider of items: Taobao

Default group: ☒

#### Price intervals

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20.00	10

[Add price interval](#)

0 - 0

Complex settings for advanced users

Save Cancel

Delivery can be also set for each price interval:

Price group name  Kids toys

Description  Toys for children from 0 to 5 years

Provider of items Taobao ▼

Default group  ☒

**Price intervals**

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20.00	10
<a href="#">Add price interval</a>				
0 - 0	0			

[Complex settings for advanced users](#)

Default value will be used if fields are empty:

Price group name  Kids toys

Description  Toys for children from 0 to 5 years

Provider of items Taobao ▼

Default group  ☒

**Price intervals**

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20.00	10
<a href="#">Add price interval</a>				
0 - 0	0			

[Complex settings for advanced users](#)

## Goods: add price interval

There is a system of interval margin for goods margin.

**Price interval is a basis of flexible pricing.** The essence of intervals is to divide group of goods by price and set own margin and delivery.

For example: there are men's pants at the price of 100 yuan, up to 1000 yuan and above. It is possible to divide into intervals: from 0 to 100 yuan, from 101 to 1000 yuan and from 1001 yuan and above. There are three intervals. And it is possible to make settings only for pants above 1000 yuan or only for pants below 1000 yuan.

We make the following settings as an example:

- Goods from 0 to 100 yuan will have 10% margin to each item and 25 yuan will be added to the total sum of all goods. Delivery by default.
- Goods from 100 to 300 yuan will have 15% margin to each item and 30 yuan will be added to the total sum of all goods. Delivery will be 10 yuan for each item and 20 yuan to total delivery.
- Goods from 300 yuan and above have 55% margin to each item and 70 yuan will be added to the total sum of all goods. Delivery by default.

Now we make settings in a special form. It is necessary to set initial value for each price interval. We add 2 additional fields to set 3 intervals. Click "Add price interval" link 2 times:

Price group name Kids toys

Description Toys for children from 0 to 5 years

Provider of items Taobao

Default group ☒

Price intervals

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20.00	10
<a href="#">Add price interval</a>				
0	-	0		

Complex settings for advanced users

Save

Cancel

This is what we get:

Price group name Kids toys

Description Toys for children from 0 to 5 years

Provider of items Taobao

Default group ☒

Price intervals

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20.00	10
<a href="#">Add price interval</a>				
0	-	0		
	-			
	-			

Complex settings for advanced users

Save

Cancel

We have enough fields now. We can start to add initial values of our intervals: 0, 100 and 300:

Price group name  Kids toys

Description  Toys for children from 0 to 5 years

Provider of items Taobao 

Default group  ☒

**Price intervals**

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals			20.00	10
<a href="#">Add price interval</a>				
0 - 100	0			
100 - 300				
300 -				

Complex settings for advanced users

System automatically added second interval value.

**What margin will be set for goods at the price of 100 yuan? It's in two intervals at once!**

Answer is the following: margin will depend on second interval (from 100 to 300 yuan), as the rightmost value is used to denote the border, and the last valid value will be one less, because the last value is already the first in the next interval.

- from 0 to 100 — last value is 99
- from 100 to 300 — last value is 299
- from 300 and above — any value from 300 to infinity

Mathematical notation is the following:  $[0; 100)$ ,  $[100; 300)$ ,  $[300; +\infty)$

Set margin from example above:

Price group name  Kids toys

Description  Toys for children from 0 to 5 years

Provider of items Taobao 

Default group  ☒

**Price intervals**

Interval CNY	Margin percent	Margin rate CNY	Delivery price for this group CNY	Fixed margin for group CNY
For all intervals		20.00		10
<a href="#">Add price interval</a>				
0 - 100	10	25		
100 - 300	15	30	10	20
300 -	55	70		

Complex settings for advanced users

The table below will show example how these settings influence goods price and delivery:

Interval CNY	Goods quantity	Goods price	Margin %	Fixed margin CNY	Delivery "Delivery value CNY"	Delivery "Fixed margin to delivery CNY"	Total sum of order with delivery
from 0 to 100	1	10	$10 \times 1 + 10\% = 11$	$11 + 25 = 36$	$36 + 20 \times 1 = 56$	$56 + 10 = 66$	66
	2	10	$10 \times 2 + 10\% = 22$	$22 + 25 = 47$	$47 + 20 \times 2 = 87$	$87 + 20 = 107$	107
from 100 to 300	1	100	$100 \times 1 + 15\% = 115$	$115 + 30 = 145$	$145 + 10 \times 1 = 155$	$155 + 20 = 175$	175
	2	100	$100 \times 2 + 15\% = 230$	$230 + 30 = 260$	$260 + 10 \times 2 = 280$	$280 + 10 = 290$	290
from 300 and above	1	1000	$1000 \times 1 + 55\% = 1550$	$1550 + 70 = 1620$	$1620 + 20 \times 1 = 1640$	$1640 + 10 = 1650$	1650
	2	1000	$1000 \times 2 + 55\% = 3100$	$3100 + 70 = 3170$	$3170 + 20 \times 2 = 3210$	$3210 + 10 = 3220$	3220

Click "Save":

Price group type

Calculates internal delivery as Taobao itself. By weight if it was provided by seller, otherwise by quantity.

Below are definitions and formulas in order to quickly understand the process. Choose appropriate scheme and use!

Basic definitions:

- **Pricing** — the mechanism of goods price formation on showcase and in orders. This is a set of rules, settings, formulas that convert Taobao price to the one set by agent according to his rules.
- **Local delivery** — delivery from Taobao vendor to logistician (within China).
- **Item code** — goods ID visible in goods card and in address bar:
