

Instance configuration

The screenshot shows the 'Provider configuration' section for the 'Taobao' provider. On the left, there is a sidebar with various menu items: Orders, Pricing, Promotion, Contents, Catalog, Users, Configuration (which is highlighted with a yellow box), Reports, and Plugins. The main content area has a breadcrumb navigation: Configuration > Instance configuration > Provider configuration. Below the breadcrumb, there are tabs: Website configuration, Orders, Delivery, Languages, Instance configuration (which is highlighted with a red box), Letters templates, and System. Under the 'Provider configuration' heading, it says 'Taobao'. The main content is titled 'Taobao integration settings'. It shows 'Selected promotion types': Default, Special, and Search's promote... (with a 'Save' button). It also shows 'Work of filters from search' (Always if available) and 'Brand filter' (Disabled).
