- [Sophisticated product price settings](#)
  - [Price rounding](#)
  - [Margin percentage](#)
  - [Minimum margin](#)
  - [Seller's discount](#)
  - [Seller's VIP discounts](#)
  - [Discount mode](#)

This is where you can set price rounding, minimum margin, seller's discounts (if any). In addition, information how to work with currency is provided in this section.

Go to "Pricing" section in your website admin area and open "Currency" tab.

## How to add currency for storefront

This section is for you if you would like to show product price in different currencies.

Base currency is the main currency you chose to work with. Base currency will display all default product prices in this currency.

"Currency" section is what you need if you need to alter currency.

## Currency

Base currency: **IDR**

### Provider currencies

Taobao - CNY

### Currencies

Showcase currencies

USD

Add currency

RUB

### Exchange rates

Follow below steps to specify currencies to be displayed and the order they will appear:

1. Take a look at all available storefront currencies.

## Currency

Base currency: **IDR**

### Provider currencies

Taobao - CNY

### Currencies

Showcase currencies

USD

Add currency

RUB

### Exchange rates

2. Add currency you need.

Exchange rates

Find necessary currency in the list:

1. Type first two or three letters of currency name in Roman letters.

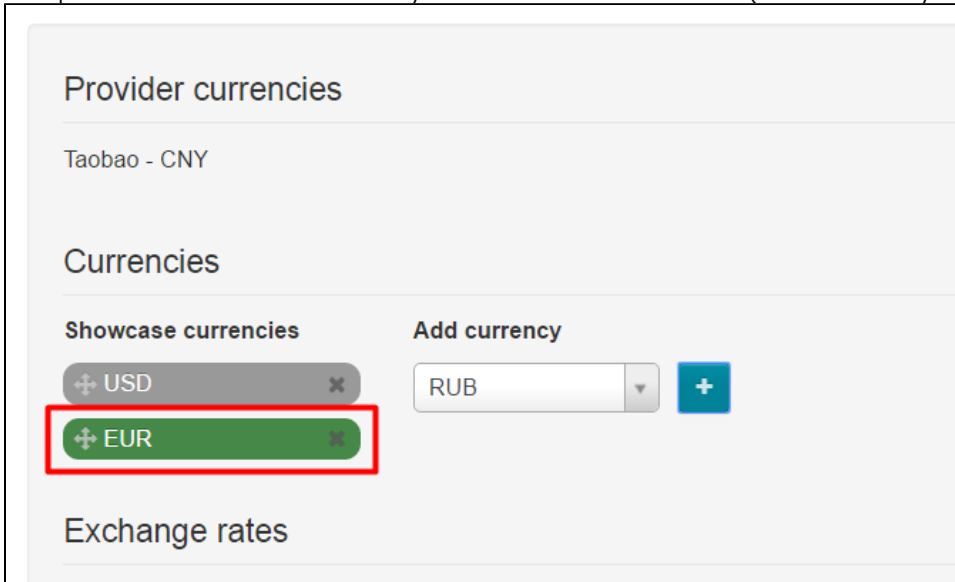

2. Scroll through the list by dragging scroll box to the right of the list.

3. Click currency when you find it. The option you selected will appear in selection window.

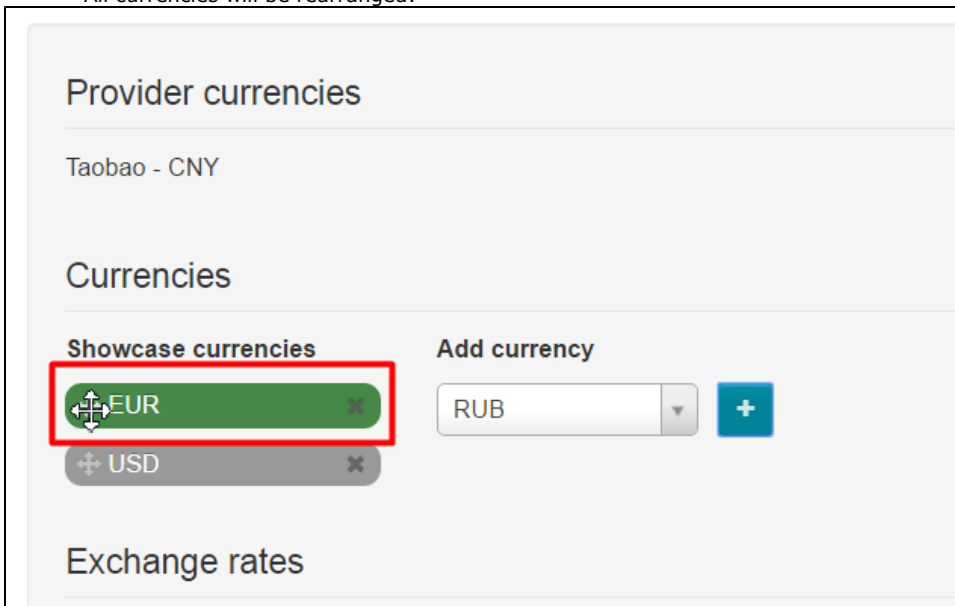

4. Click plus button in order to add currency to the list on the left-hand side (the new currency will be highlighted in green).

5. Rearrange currencies to your liking if necessary:
- Hover cursor over Move icon (four-headed arrow) to the left of currency name.

- Click and hold the left mouse button when cursor changes to the four-headed arrow
- Drag currency up or down and place it as you need without releasing mouse button.
- All currencies will be rearranged:

6. Click Delete icon (x) to the right of currency name if it should be deleted.

The screenshot shows the 'Currencies' management interface. Under the 'Showcase currencies' section, there are three currency buttons: EUR (green), USD (grey), and RUB (grey). The RUB button is highlighted with a red rectangle, and a mouse cursor is clicking the 'x' delete icon next to it. A 'Delete' tooltip is visible. To the right, the 'Add currency' section shows a dropdown menu with 'CNY' selected and a blue '+' button. Below the currencies section is the 'Exchange rates' section.

7. Click "Save" button at the bottom of page when you're done.

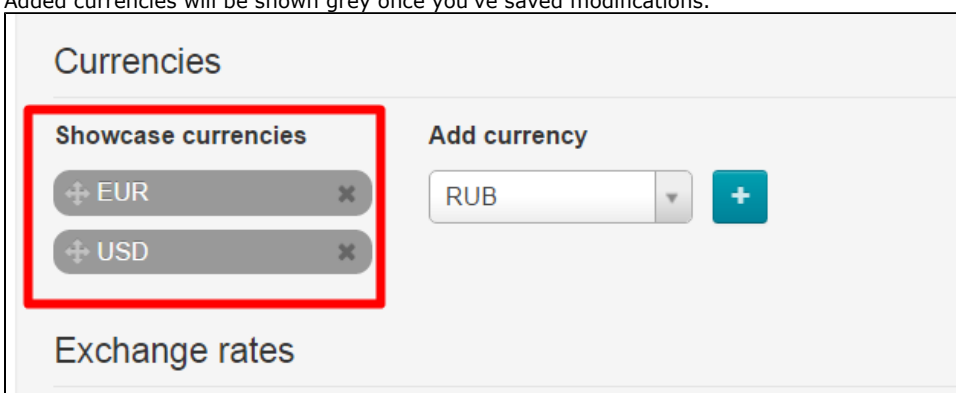

This screenshot shows the 'Currencies' management interface after the RUB currency has been removed. The 'Showcase currencies' section now only contains EUR and USD. The 'Exchange rates' section is expanded, showing a table of exchange rates for CNY, EUR, USD, and RUB. At the bottom left, the 'Save' button is highlighted with a red rectangle and a mouse cursor is clicking it. The footer shows the 'otcommerce.com' logo.

Default settings	Sync mode	Rate margin
	Synchronization with Central Bar	45 %

Currency 1	Rate	Currency 2	Rate
1 CNY	= 2000.000000	IDR	
1 EUR	= 10.000000	IDR	
1 USD	= 1.000000	IDR	
1 CNY	= 0.137184	EUR	
1 CNY	= 0.145634	USD	
1 RUB	= 1	IDR	
1 CNY	= 1	RUB	

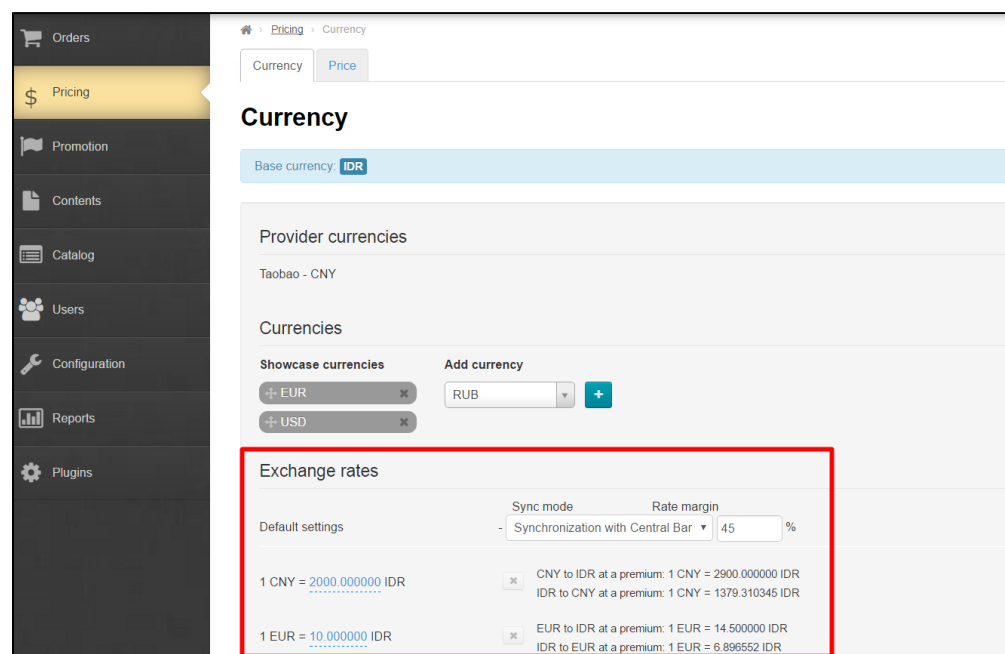

8. Added currencies will be shown grey once you've saved modifications.

Once being saved, currencies can be added, deleted or rearranged. Be sure to click Save button to save your changes.

## How to set currency rate manually

In some cases, it is a good practice to work with your own currency rate rather than synchronize it with the Central Bank of Russian Federation.

We recommend you select "Synchronization with Central Bank of Russian Federation" option when you add new currencies. You will know approximate cost of each currency and it will make your work easier.

You can start to set the currency rate after you've added all currencies and synchronization with the Central Bank of Russian Federation was done.

First, you should disable synchronization by selecting "Without synchronization" option from dropdown list.

## Price rounding

This is where you can specify number of decimal places (digits after decimal point) when rounding off product price.

It is specified as a numeric value.

You need to click blue link in order to specify number of decimal places when rounding off item price.

The screenshot shows the 'Price' configuration page. At the top, there are tabs for 'Currency' and 'Price'. Below the tabs, the 'Price' section is highlighted. In the 'Rounding up' section, there is a red box around the 'Extended' link and the value '0'. Below this, there is a warning message: 'Attention! Selecting the rounding accuracy affects the calculation of the final amount of the order.' Below the warning, there are four rows of configuration options: 'Markup percentage' with a value of '10.0000', 'Minimum markup' with a value of '2.00' and a unit of 'CNY', 'Seller's discount' with a value of 'Allow', and 'Discount mode' with a dropdown menu showing 'The default mode is configured for all.' and a checkmark button.

Next, you should enter value-indicating number of decimal places when rounding item price in the edit form.

The screenshot shows the 'Price' configuration page. In the 'Rounding up' section, there is a red box around the input field containing the value '2'. To the right of the input field are three buttons: a checkmark button, a delete button (x), and a close button (x). Below the input field, there is a warning message: 'Attention! Selecting the rounding accuracy affects the calculation of the final amount of the order.' Below the warning, there are four rows of configuration options: 'Markup percentage' with a value of '10.0000', 'Minimum markup' with a value of '2.00' and a unit of 'CNY', 'Seller's discount' with a value of 'Allow', and 'Discount mode' with a dropdown menu showing 'The default mode is configured for all.' and a checkmark button.

Save modifications by clicking checkmark button.

The screenshot shows the 'Price' configuration page. In the 'Rounding up' section, there is a red box around the checkmark button. To the left of the checkmark button is the input field containing the value '2'. To the right of the checkmark button are two buttons: a delete button (x) and a close button (x). Below the input field, there is a warning message: 'Attention! Selecting the rounding accuracy affects the calculation of the final amount of the order.' Below the warning, there are four rows of configuration options: 'Markup percentage' with a value of '10.0000', 'Minimum markup' with a value of '2.00' and a unit of 'CNY', 'Seller's discount' with a value of 'Allow', and 'Discount mode' with a dropdown menu showing 'The default mode is configured for all.' and a checkmark button.

Click "Delete" button (x) in edit field if you want to delete value.

## Minimum margin

Margin percentage will be low if product price is low. Possibility to set minimum margin is also provided. Minimum margin (not the margin percentage) will be added to product price if the above-mentioned margin percentage is less than the minimum margin value.

**For example,** product costs 10 CNY. You've set margin 5%. Thus, final price with 5% margin (10+5%) would be 10,5 CNY. Product will cost 10+10 = 20 CNY if we set minimum margin for 10 CNY.

### Important!

Minimum margin for goods should be specified in CNY.

Click blue link to specify minimum margin.
