This is where you can set price rounding, minimum margin, seller's discounts (if any). In addition, information how to work with currency is provided in this section.

Go to "Pricing" section in your website admin area and open "Currency" tab.

How to add currency for storefront

This section is for you if you would like to show product price in different currencies.

Base currency is the main currency you chose to work with. Base currency will display all default product prices in this currency.

"Currency" section is what you need if you need to alter currency.

Currency

Base currency: **IDR**

Provider currencies

Taobao - CNY

Currencies

Showcase currencies

✚ USD ✕

Add currency

RUB ▼ +

Exchange rates

Follow below steps to specify currencies to be displayed and the order they will appear:

1. Take a look at all available storefront currencies.

Currency

Base currency: **IDR**

Provider currencies

Taobao - CNY

Currencies

Showcase currencies

✚ USD ✕

Add currency

RUB ▼ +

Exchange rates

2. Add currency you need.

The screenshot shows the 'Currency' settings page. At the top, it says 'Base currency: IDR'. Below this, there are sections for 'Provider currencies' (listing 'Taobao - CNY'), 'Currencies', 'Showcase currencies' (with a 'USD' tag), and 'Exchange rates'. The 'Add currency' dropdown menu is highlighted with a red box, showing 'RUB' as the selected option. A hand cursor is pointing at the dropdown arrow.

How to add new currency

Click dropdown list arrow in the right-hand menu "Add currency".

This screenshot is similar to the one above, but the dropdown arrow in the 'Add currency' menu is highlighted with a red box. A hand cursor is pointing at the arrow, indicating the next step in the process.

Find necessary currency in the list:

1. Type first two or three letters of currency name in Roman letters.

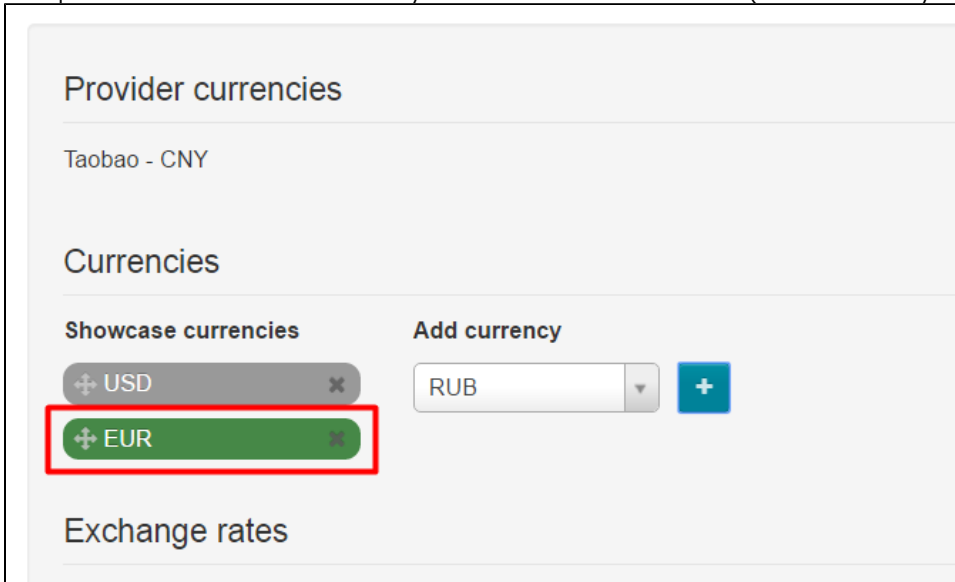

2. Scroll through the list by dragging scroll box to the right of the list.

3. Click currency when you find it. The option you selected will appear in selection window.

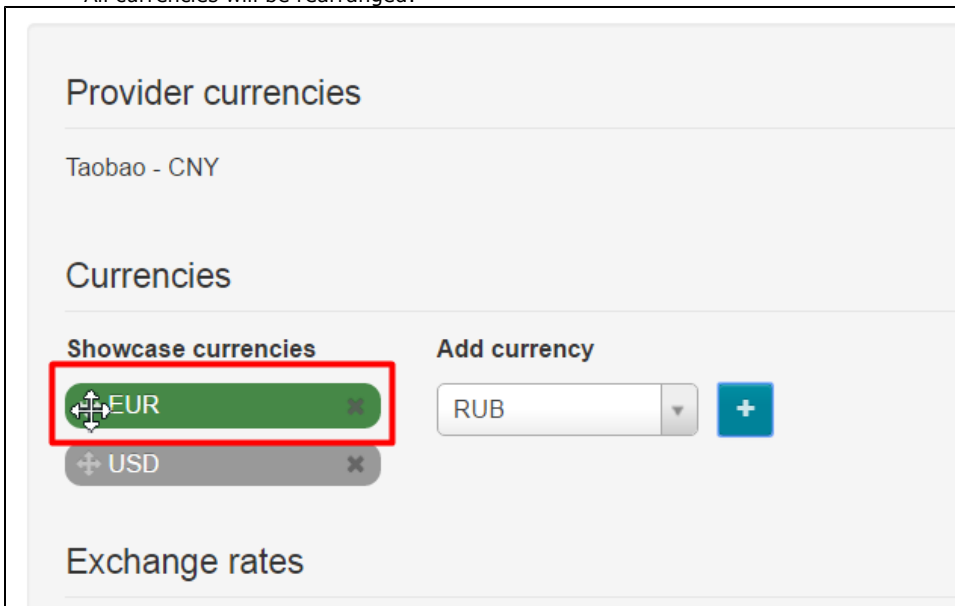

4. Click plus button in order to add currency to the list on the left-hand side (the new currency will be highlighted in green).

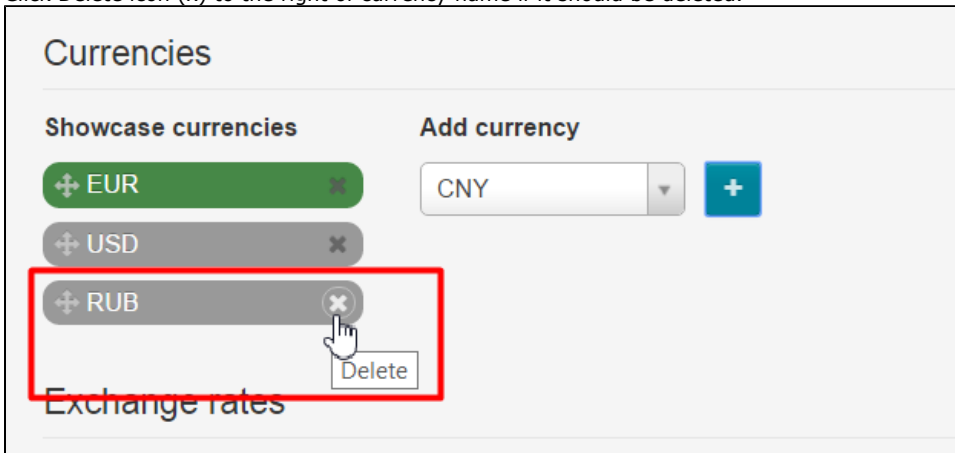

5. Rearrange currencies to your liking if necessary:
- Hover cursor over Move icon (four-headed arrow) to the left of currency name.

- Click and hold the left mouse button when cursor changes to the four-headed arrow
- Drag currency up or down and place it as you need without releasing mouse button.
- All currencies will be rearranged:

6. Click Delete icon (x) to the right of currency name if it should be deleted.

8. Added currencies will be shown grey once you've saved modifications.

Once being saved, currencies can be added, deleted or rearranged. Be sure to click Save button to save your changes.

How to set currency rate manually

In some cases, it is a good practice to work with your own currency rate rather than synchronize it with the Central Bank of Russian Federation.

We recommend you select "Synchronization with Central Bank of Russian Federation" option when you add new currencies. You will know approximate cost of each currency and it will make your work easier.

You can start to set the currency rate after you've added all currencies and synchronization with the Central Bank of Russian Federation was done.

First, you should disable synchronization by selecting "Without synchronization" option from dropdown list.

Minimum margin

Margin percentage will be low if product price is low. Possibility to set minimum margin is also provided. Minimum margin (not the margin percentage) will be added to product price if the above-mentioned margin percentage is less than the minimum margin value.

For example, product costs 10 CNY. You've set margin 5%. Thus, final price with 5% margin (10+5%) would be 10,5 CNY. Product will cost 10+10 = 20 CNY if we set minimum margin for 10 CNY.

Important!

Minimum margin for goods should be specified in CNY.

Click blue link to specify minimum margin.
