 - [Currency exchange rates](#)
 - [Bank synchronization mode](#)
 - [Without synchronization with bank](#)
 - [How to edit currency exchange rate](#)
 - [How to delete currency exchange rate](#)

This section focuses on setting currency exchange rates on your website.

Go to **Pricing > Currency** in admin area of your website.

Description

This is where you can view your internal currency in which you are billed. Additionally, you can set the following:

1. Showcase currencies
2. Currency exchange rates
3. Synchronization with the Central Bank of the Russian Federation (Synchronization with any other bank requires ["Converter 2.0" Module](#)).

OT Box currencies

It's important to know what currency types can be set during Box installation for correct price calculation and display (as well as deposit, payments and other money transactions). They are the following:

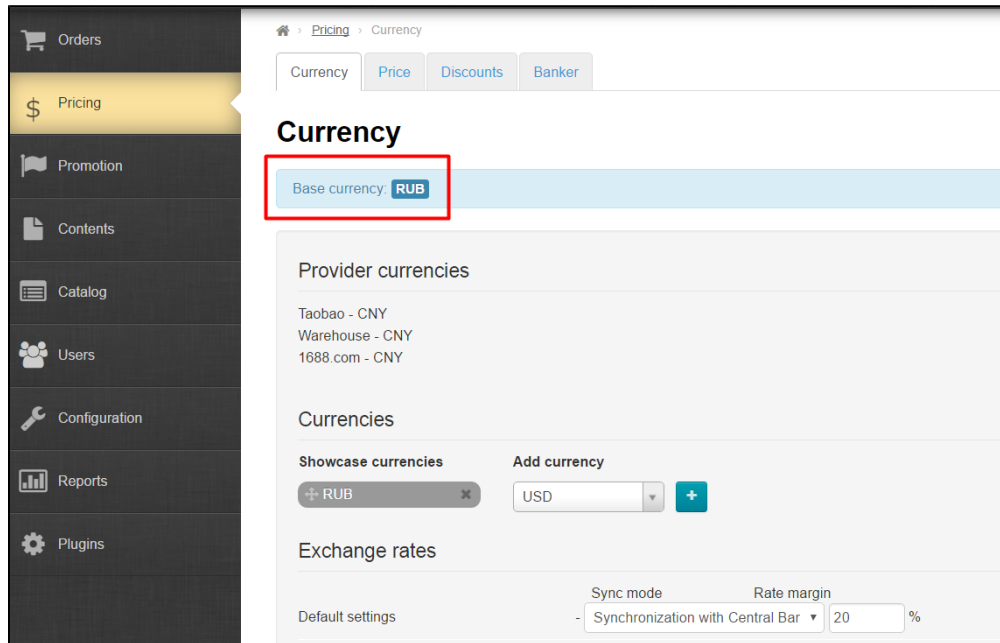

1. Internal payments currency (site internal currency)
2. Showcase currency
3. Trade provider's currency

All these currencies can be set in "Exchange rates" section (See below for detailed information how to set currencies).

How to set currency

Internal currency

The first value to be specified in this section is internal currency. This currency is displayed in shopping cart and orders. Internal currency is set at the time of key registration and can no longer be modified on your own.

Website owner should contact (make a ticket) Open Trade Commerce’s technical support team if it’s necessary to change internal currency.

Note that old (existing on the current moment) orders can’t be recalculated for new internal currency.

Trade provider’s currency

Trade provider’s currency depends on what provider is set up for your Box.

Provider	Currency
Taobao	CNY
Warehouse	CNY
Yahoo and Yahoo auction	JPY
Kitmall	RUB
Alibaba 1688	CNY

Trade provider’s currency is **unchangeable** and can be found here:

See below how to add currencies and change their order.

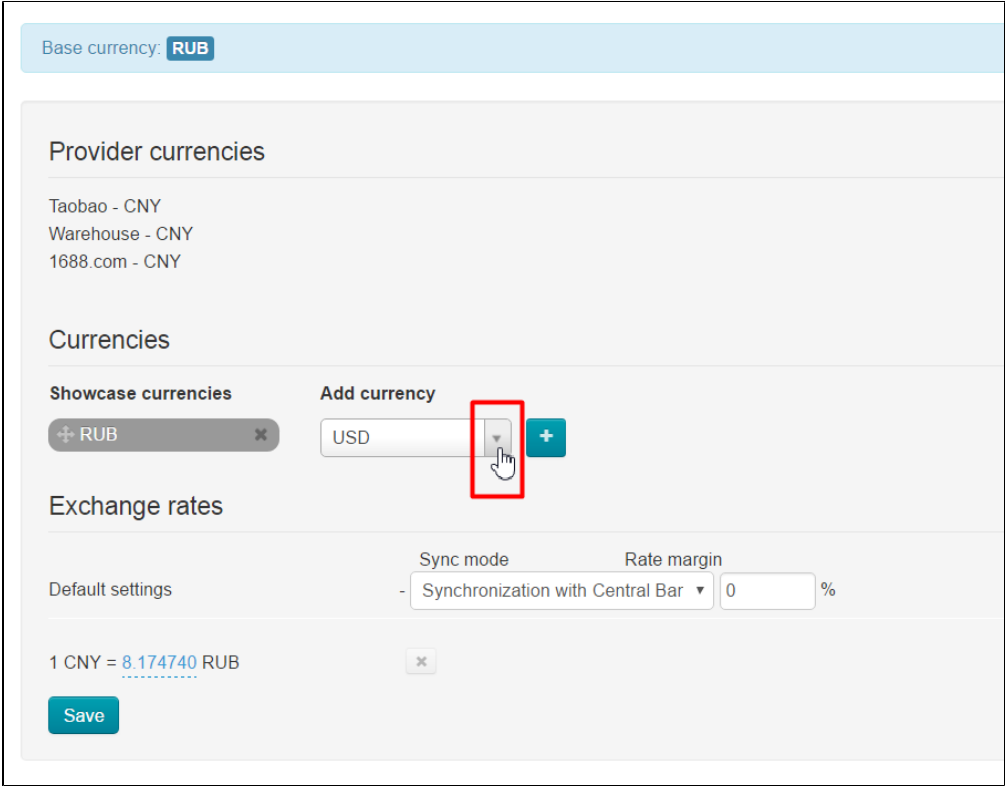

First, you should decide what currency will be the primary one (it means that it will be the first on the list and will be displayed on the homepage as well as on goods list). For example, we would like to make the following currencies such as USD, RUB, and JPY applicable on website with USD being the main one.

You need to add currencies from the list on the right-hand side to get started.

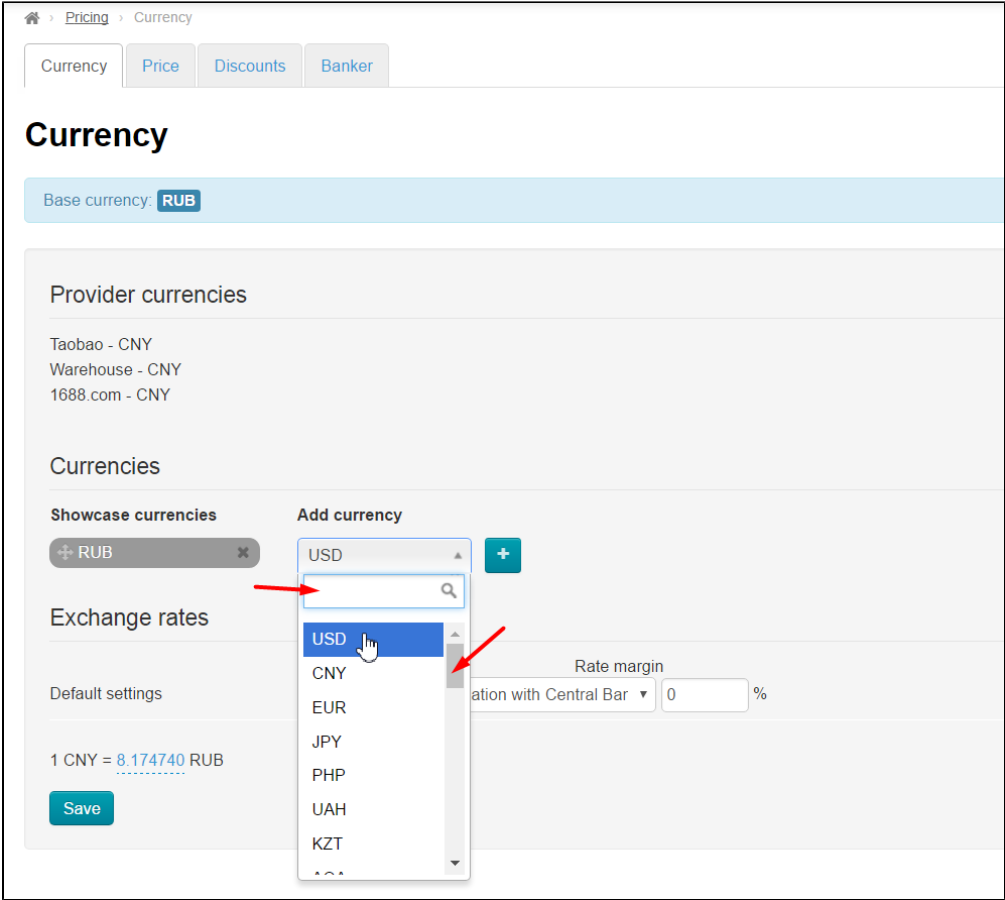

Follow these steps to add new currency:

Click dropdown list arrow in the right-hand menu "Add currency".

Search for necessary currency in the list that appears: type first two or three letters of currency name in Roman letters or scroll through the list by dragging scroll box on the right of the list.

Click currency when you reach it. The option you have selected will appear in selection window.

Save

Click "Save" button at page bottom when you're done.

The screenshot shows the 'Currency' settings page. At the top, there are tabs for 'Currency', 'Price', 'Discounts', and 'Banker'. Below the tabs, the 'Currency' section is active. It features a 'Base currency' dropdown set to 'RUB'. Under 'Provider currencies', there are three entries: 'Taobao - CNY', 'Warehouse - CNY', and '1688.com - CNY'. The 'Currencies' section has a 'Showcase currencies' list with 'USD', 'RUB', and 'JPY' (all in green). To the right is an 'Add currency' dropdown set to 'CNY' with a plus button. Below this is the 'Exchange rates' section, showing 'Sync mode' as 'Synchronization with Central Bar' and 'Rate margin' as '0 %'. At the bottom left, the text '1 CNY = 8.174740 RUB' is displayed. A red box highlights the 'Save' button at the bottom left of the page.

Added currencies will be grey once you've saved modifications.

This screenshot shows the same 'Currency' settings page after the changes have been saved. The 'Base currency' remains 'RUB'. The 'Provider currencies' list is unchanged. In the 'Currencies' section, the 'Showcase currencies' list now shows 'USD', 'RUB', and 'JPY' in grey, indicating they are no longer active. The 'Add currency' dropdown is still set to 'CNY'. The 'Exchange rates' section remains the same. A red box highlights the 'Showcase currencies' list.

Once being saved, currencies can be added, deleted or rearranged. Be sure to click Save button to save changes.

New currency won't be immediately available on website after all actions were done. It is necessary to set up exchange rate for this currency (see description below) if you need to make it available for display.

Currency exchange rates

All necessary variants of currency conversion are added automatically when changing Showcase currencies, adding trade provider or altering internal currency (by submitting support request). One can see currency exchange rates on the left-hand side while currency rate values including specified margin are given on the right-hand side.

You should select synchronization mode next.

Bank synchronization mode

Using automatic synchronization we always keep currency exchange rate up to date on the website with no periodic manual corrections. **Synchronization with bank is done once per 24 hours.**

“Converter 1.0” Module available for free in all OT Box versions allows synchronization with the Central Bank of the Russian Federation exclusively. We recommend installing “Converter 2.0” Module (it is provided in OT Box Top version 1.7.0 and later) if you need to synchronize currency exchange rates with any other bank. Connection to any bank from the list <http://bank.exchange> is free with “Converter 2.0” Module.

Let’s refer to “Default settings” row to activate synchronization with the Central Bank of the Russian Federation and also to specify margin rate.

How to delete currency exchange rate

Note! You should review currencies list in use first before deleting unwanted ones if currency exchange rate is bound with trade provider, showcase and internal currency. It is possible to change showcase currencies on your own. Internal currency can be changed only by technical support.

- Contact technical support team to change internal currency. The important point is that after altering internal currency all past orders and money transactions will be shown in terms of formerly used currency.
- Trade provider currency is unchangeable. Please contact technical support team if you want to disable connection to trade provider.

Unnecessary currency conversion variants can be deleted once you've changed **showcase currency**. For example, Euro-currency (the Euro) was deleted. Then all values associated with this currency can be deleted from the list.

Click "Delete" button (x) on the row containing appropriate conversion setting if you want to delete this setting.

Note that in case of inactive currency the presence of currency exchange rate and synchronization mode associated with it won't affect site performance. Besides, inactive rate is neglected. That is why its removal is merely aesthetic.

If the rate shown in red appears after saving it means that you deleted exchange rate used in operations and it was automatically added again.

Now, you should set currency exchange rates shown in red once again. For additional information take a look at "Without synchronization" section.
