

OT Box settings for cooperation with Shiptor

- [Delivery](#)
 - [Key settings](#)
 - [If "Instance configuration" tab is missing?](#)
 - [Set external delivery](#)
- [Autopurchase settings](#)

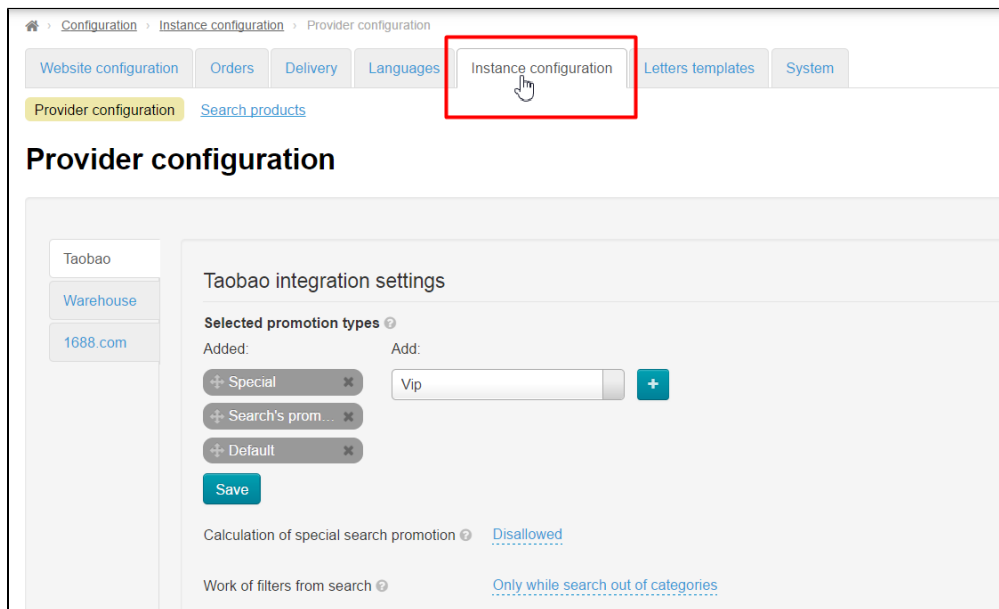

Delivery

Open "Configuration" section:

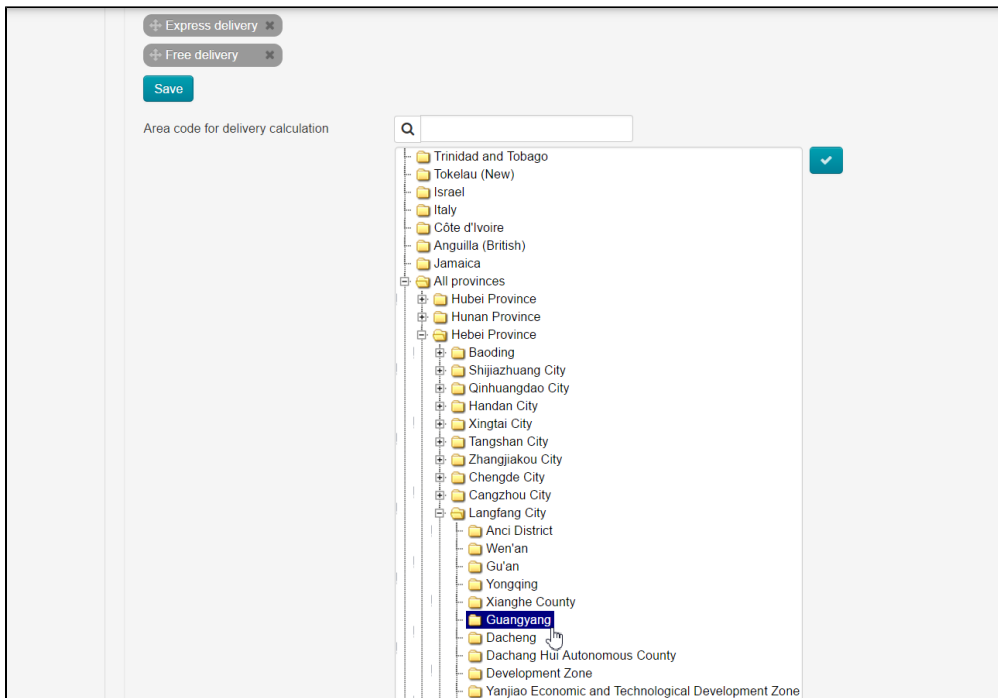

Key settings

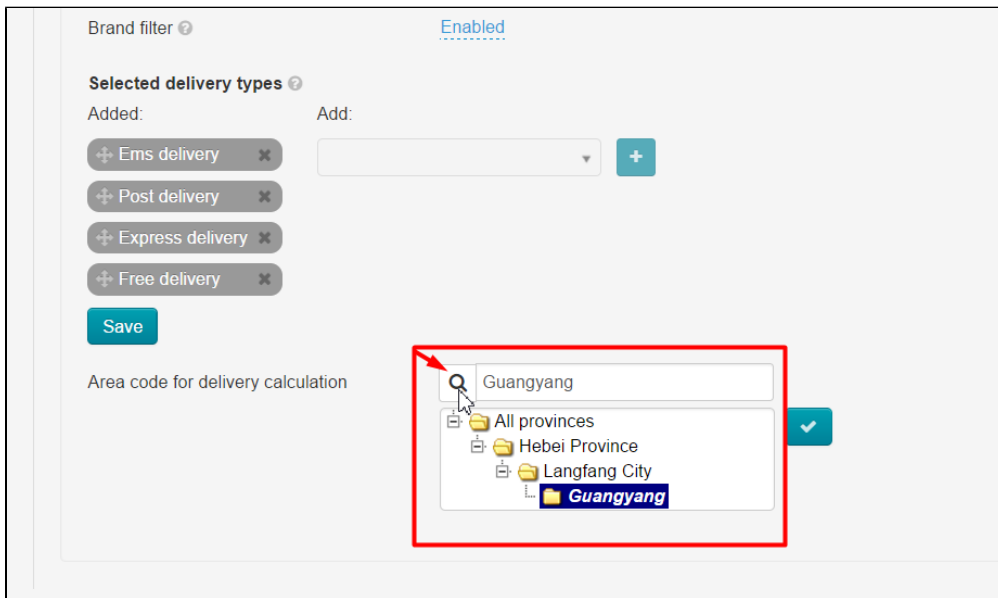

Choose "Instance configuration" tab. Choose Taobao in Provider configuration:

Look for list with regions and write Guangyang region into search bar:

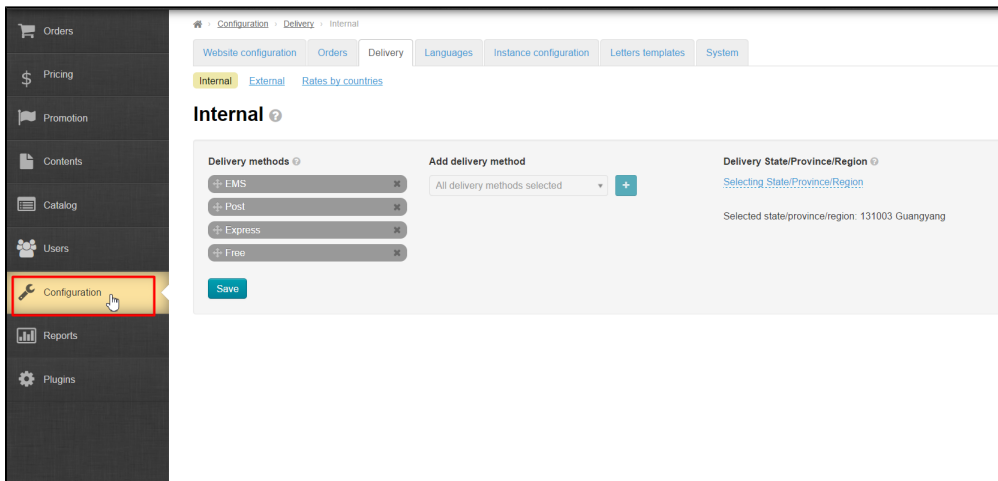

Click region on the list and make it blue, check-box should become darker and active for click. Save changes clicking check-box:

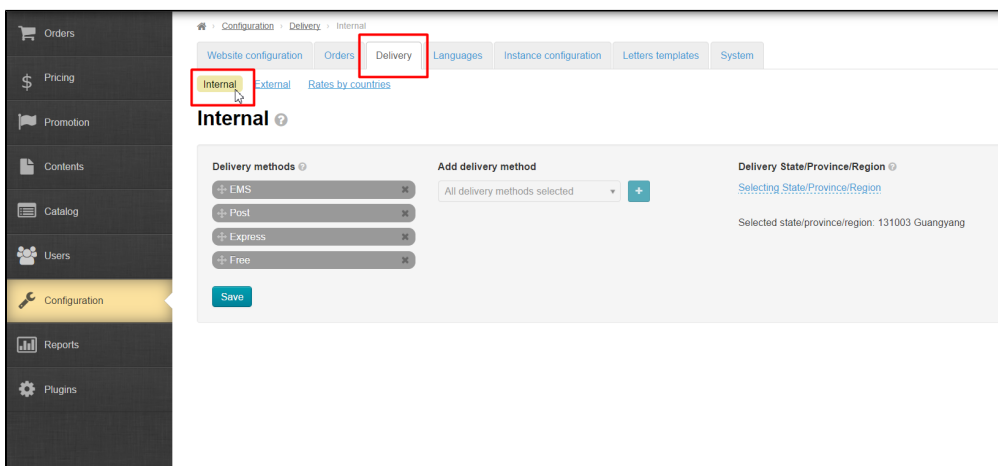

If "Instance configuration" tab is missing?

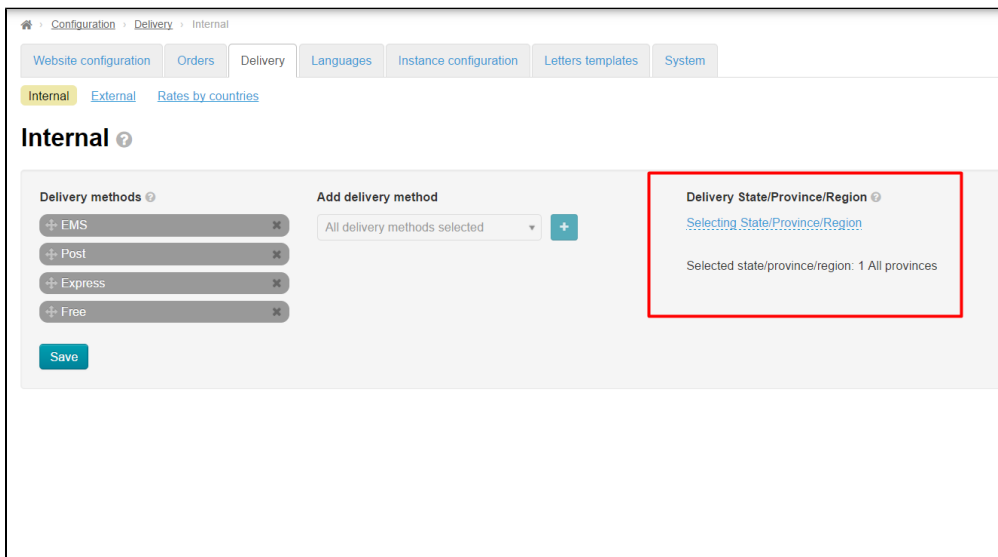

Some OT Box versions don't have "Instance configuration" tab where provider configurations are done. In this situation go to "Configuration" section:

Open "Delivery" tab "Internal":

There is a block on the right to set delivery region:

Click "Select region":

Configuration > Delivery > Internal

Website configuration | Orders | Delivery | Languages | Instance configuration | Letters templates | System
