

Social media

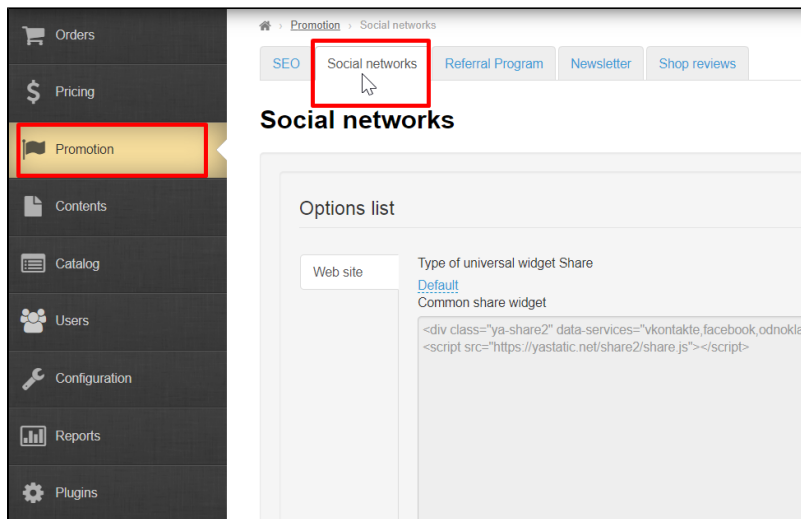

- Where are social networks icons located in website design?
 - On all pages of website in the footer (at the very bottom)
 - During registration and authorization
 - On product page
- Language version: different widgets for selected languages
- Set up by application type: if you need customization
- Set up widgets for all pages of the site
- Autentification system: select social networks for users

Setting up social networks widgets, both for site pages and for authentication (log in or register using an available social network).

Widget is a social networking icon that buyers can log on to, share information with friends or go to your social networks page.

Location in admin panel: Promotion Social networks

Where are social networks icons located in website design?

Location of icons (widgets) depends on selected website design. We will write separately what to do if you have your own design (customized one).

Using Elastic design theme example

Read ["General" \(Configuration System General\)](#) article how to select website design theme

Read ["Design template" \(Configuration Website configuration Design template\)](#) article how to edit website design theme

On all pages of website in the footer (at the very bottom)

Customer will click an icon and new window will open your social network page/group

During registration and authorization

Customer can click social network "Sign in with" and skip the fields for authorization and registration

Language version: different widgets for selected languages

It's possible to set own widgets for each language version of website.

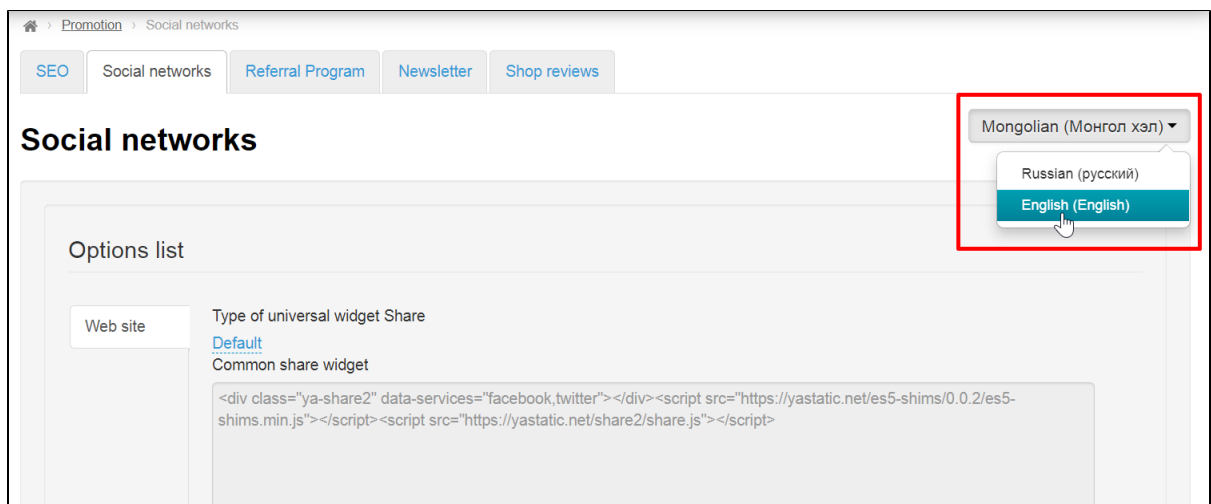

Read how to set language version in ["Multilingualism" article](#) ([Configuration](#) [Languages](#) [Multilingualism](#))

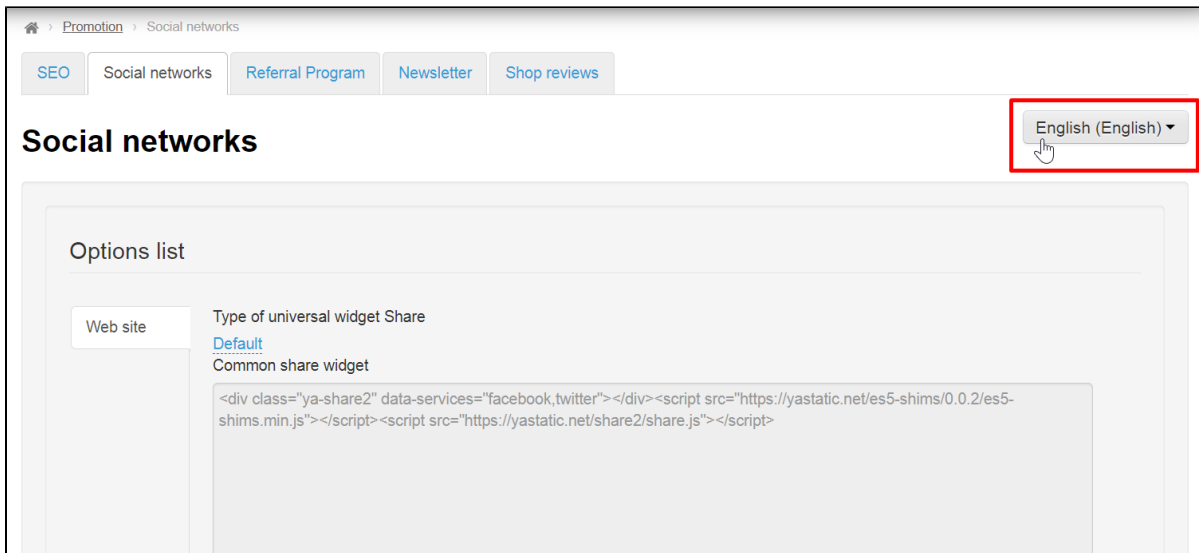

Open "Social networks" tab in "Promotions" section to select language version

A button with a list of available language versions will be on the right

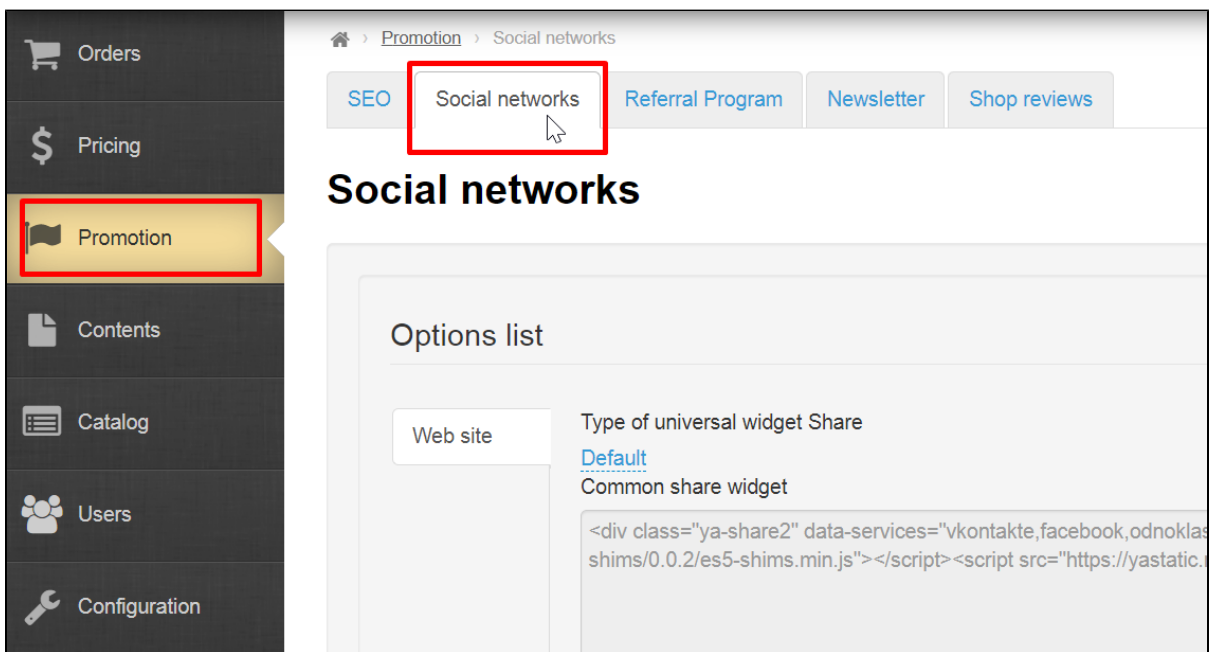

Select necessary language version from the list and set it according to instructions below

Set up by application type: if you need customization

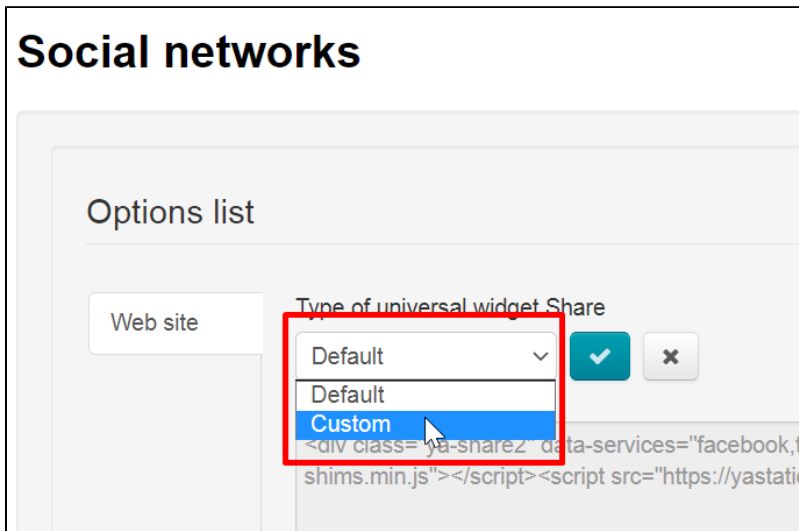

Open "Social networks" tab in "Promotion" section to add social networks into customized website

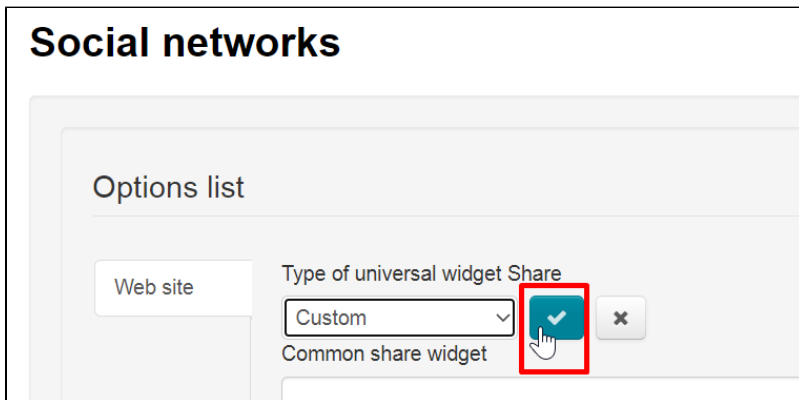

Click "Default" in "Type of universal widget Share" block

Select "Custom"

Click checkmark button to save

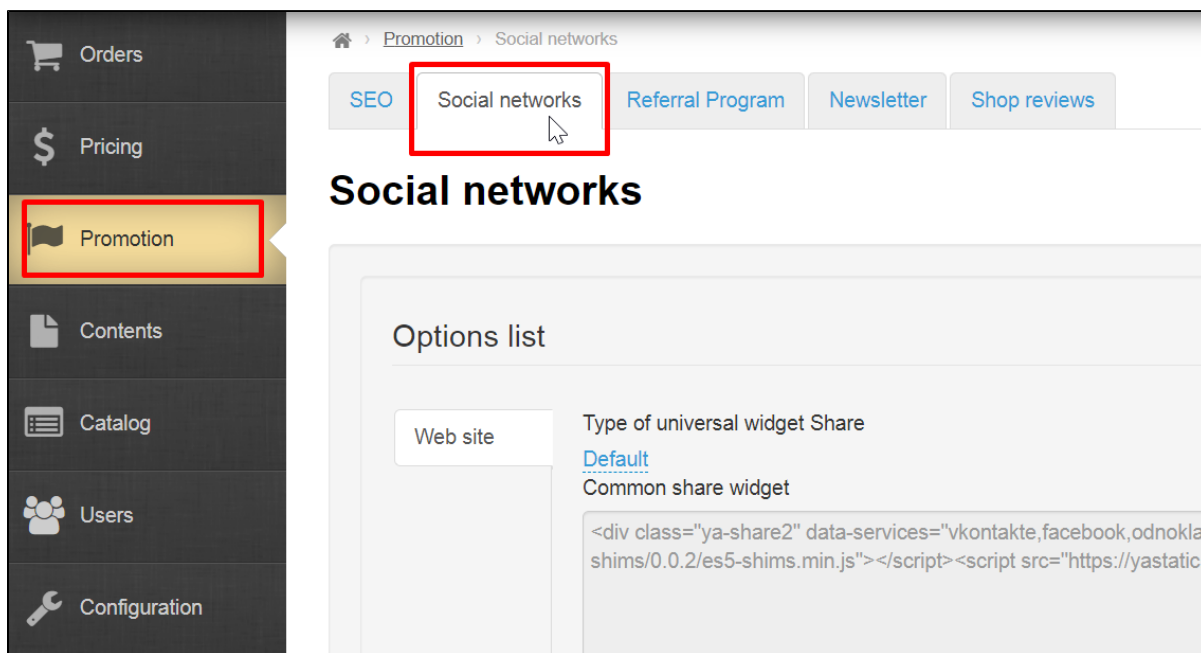

A window for writing code has become active and now you can use your code for social networks widgets

Set up widgets for all pages of the site

Open "Social networks" tab in "Promotion" section to set up widgets

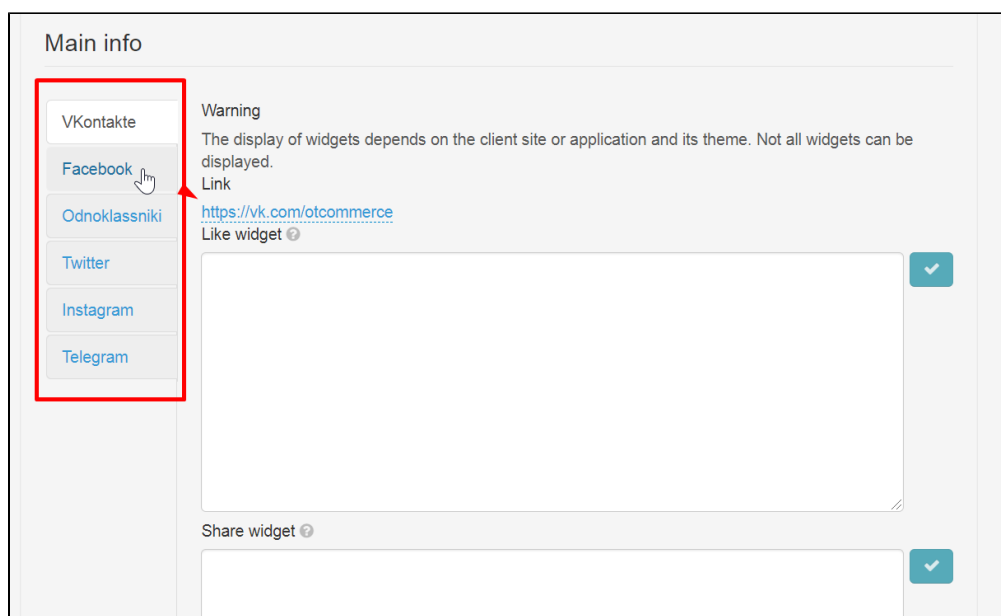

Each social network has several options for interaction:

- Open
- Like
- Share
- Subscribe

Widgets display depends on client site or application, as well as its design theme. Some widgets can't be displayed

There are 4 blocks to fill on the tab of each available social network

You can get all widgets on social media sites or upon request in Google or Yandex: "Twitter widget", "Facebook widget", etc.

You can click the links from the table for convenience:

Icon	Social network	Link to set up widget
	Twitter	Share https://help.twitter.com/ru/using-twitter/add-twitter-share-button Buttons https://help.twitter.com/ru/using-twitter/twitter-buttons
	Google	https://developers.google.com/identity/sign-in/android/sign-in-identity
	Facebook	https://developers.facebook.com/docs/plugins (all widgets are located in the menu on the left)
	Apple	https://developer.apple.com/sign-in-with-apple/

Click the title of necessary social network on the left to set it up
