How it works?

Information

Consider work of the plugin on the example of payments through PayPal.

Contact OT technical support or your manager in Skype to add other methods of accepting payments to the list.

Your customer makes an order, draws it up and chooses PayPal, for example, at the payment stage.

P/	AYMENT	×
0	rder Order-000000301	
	То рау: \$250	
	O Cash	
	O Payment in system	
	ELECTRONIC WALLETS	
	PayPal PayPal PAY	
	CANCEL	

A page appears with a message about payment details after clicking "Pay" button. (All field titles and descriptions can be changed. See "Edit" block below).

Please send your order payment to Paypal by email at test@test.com							
User full name	Ivanov Ivan Ivanovich						
Purpose	Order payment Order-0000000301						
Amount	\$250						
Comment							
Upload file	Выберите файл Файл не выбран						
SUBMIT							

Your customer goes to PayPal (Online or through the terminal) and pays specified amount.

When payment is done he returns to the tab with this message. Before confirming payment, you can specify payment details and attach screenshot of the receipt.

Click "Submit" to send payment data.

Please send your order payment to Paypal by email at test@test.com

Error messages

The list of settings contains fields where you need to write an error message. We recommend you describe the error briefly and in detail to make the customer understand immediately what he did wrong.

Error messages are edited in the same way as all other fields: click blue dotted line to change text and save changes using checkmark button.

An example how the message looks like:

Please send your order payment to Paypal by email at test@test.com				
User full name		Ivanov Ivan Ivanovich		
Purpose		Order payment Order-000000301		
Amount		\$250		
Comment				
	Comment is r	required and can't be empty		
Upload file	File is require	Выберите файл Файл не выбран ed and can't be empty		
SUBMIT				

Opportunity to upload image

We recommend to enable this field and make it mandatory if you need to receive payment receipts image/photo. Or you can remove the field or make it optional if payment receipt image/photo is not required.

Required action is a necessary parameter for making payment.

There are 3 fields responsible for uploading the image:

Comment error message of direct payment			
Co	omment is required and can't be empty		
U	bload file field state of direct payment		
Re	equired		
U	bload file message of direct payment		
U	bload file		
U	bload file error message of direct		
pa	ayment		
Fi	le is required and can't be empty		
Sı	ubmit message of direct payment	•	
S	ubmit		
St	ate of external transaction id of direct		
pa	ayment		
N	ot required		

Upload file field state is necessary to show or hide the field, as well as make it mandatory. Click blue dotted line and select appropriate value from the list.

Save changes clicking checkmarked button.

Field title and error message are edited in the same way as all other fields: click blue dotted line to change text and save changes using checkmark button.

Upload file field state of direct payment Required	
Upload file message of direct payment Upload file	
Upload file error message of direct payment	1
quired and can't be empty 😒 🔽	×
Submit message of direct payment	J
Submit	
State of external transaction id of direct payment	
Not required	

Setup is complete. Notification texts, as well as a list of available payment methods, can be edited at any time.

Payment processing

Your customer makes an order, draws it up and chooses PayPal, for example, at the payment stage.

PAYMENT	×
Order Order-000000301
