

# SMS service settings

- [Registering and configuring Twilio SMS service](#)
- [Setting up services in OT admin panel](#)
- [Enable registration by SMS](#)
- [Enable SMS notifications](#)
- [Add / edit customer's phone number](#)
- [Confirm customer's phone number](#)
- [Custom sms service](#)

Connecting SMS service gives 2 convenient ways for customer to interact with your online store.

- **SMS registration** — customer adds phone number instead of e-mail and receives confirmation code.
- **SMS notification** — customer receives notification when order status changes, for example about changing the order status.

**Sending news, promotions and discounts by SMS is not provided by OT Box functionality.** However, such a service is provided by third-party SMS services.

You can set up **SMS registration** for your customers, as well as the ability to send various **SMS notifications about order or shopping cart status** starting from admin version 1.12.2.

**It's necessary to follow the steps to set SMS registration:**

1. Select and configure SMS service
2. Make settings in OT Box (You should [update OT Box](#) if admin panel version is lower than 1.12.2. Then make all the described site settings)
3. Set SMS registration
4. Optionally enable SMS notifications about order and shipping cart status

# Registering and configuring Twilio SMS service

Service of sending SMS in English. Therefore, all data is indicated in English. A complete list of countries is available. Website is available in three languages: English, German and Japanese.

## Registration

Go to <https://www.twilio.com/SMS> and click "Sign up" button

Fill in registration form.

A screenshot of the Twilio registration form. The form is divided into two columns. The left column lists features: 'WITH TWILIO YOU CAN BUILD:' followed by a list of services with green checkmarks: SMS marketing, Omnichannel contact center, Call tracking, Web chat, Push notifications, Alerts and notifications, and Phone verification. The right column contains input fields for 'First Name \*', 'Last Name \*', 'Email \*', and 'Password (14+ Characters) \*'. Below these fields is a checkbox for 'I accept the Twilio Terms of Service and have read the Twilio Privacy Statement. If I am a micro- or small enterprise or a not-for-profit organization in the EEA or UK, I agree to the European Electronic Communications Code Rights Waiver.' At the bottom right is a red button labeled 'Start your free trial'.

When all the fields are filled in, put a tick, agreeing to the privacy policy and click "Start your free trial" button.

WITH TWILIO YOU CAN BUILD:

- ✓ SMS marketing
- ✓ Omnichannel contact center
- ✓ Call tracking
- ✓ Web chat
- ✓ Push notifications
- ✓ Alerts and notifications
- ✓ Phone verification

The screenshot shows the 'Sms service settings' interface. On the left, there's a sidebar with 'Sms service 1' and a '+' icon. The main area contains several fields: 'Sms service' (twilio.com), 'Account info' (Fgh69304Gjls00), 'Account secret' (\*\*\*\*\*), 'Sender's info' (+09343768000), 'Api Id' (Not set), 'Is current sms service enabled for SMS distribution' (a dropdown menu currently showing 'Enabled'), 'Phone for test message' (Not set), and 'Testing sms service' (a 'Test' button). A red rectangle highlights the 'Enabled' dropdown and the adjacent blue checkmark button with a white cursor icon.

The use of service in mailing lists can be enabled or disabled at any time.

Add your own phone number to test service work.

This screenshot shows the same 'Sms service settings' form. The 'Is current sms service enabled for SMS distribution' dropdown is now set to 'Enabled'. A red rectangle highlights the 'Phone for test message' input field, which contains the number '+79343768000'. To the right of the input field are a blue checkmark button and a grey 'x' button. The 'Test' button is visible at the bottom.

Click "Save" button.

This screenshot shows the 'Sms service settings' form with the 'Phone for test message' field filled with '+79343768000'. A red rectangle highlights the blue checkmark button (the save button) next to the phone number field. The 'Test' button is at the bottom.

Then click "Test" button and wait for a message to specified number.

## Setting up SMS service templates

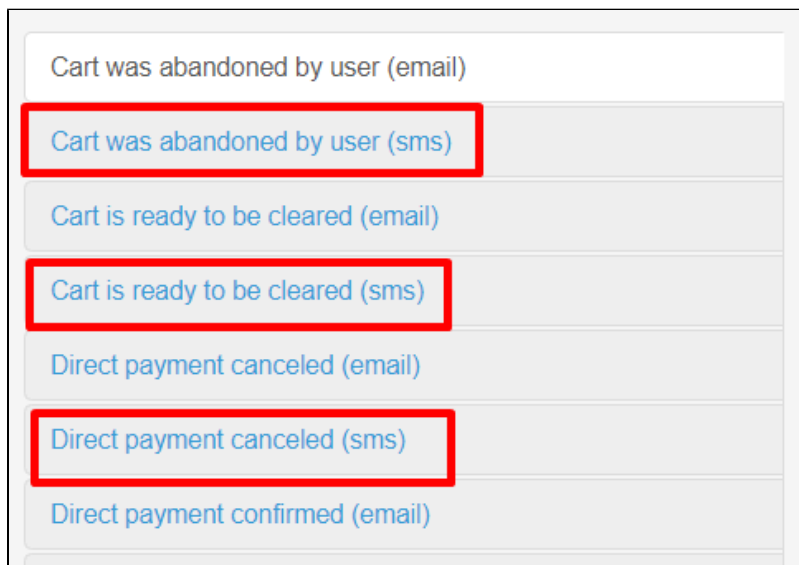

### Important!

1 **SMS** in Latin can hold up to 160 characters.

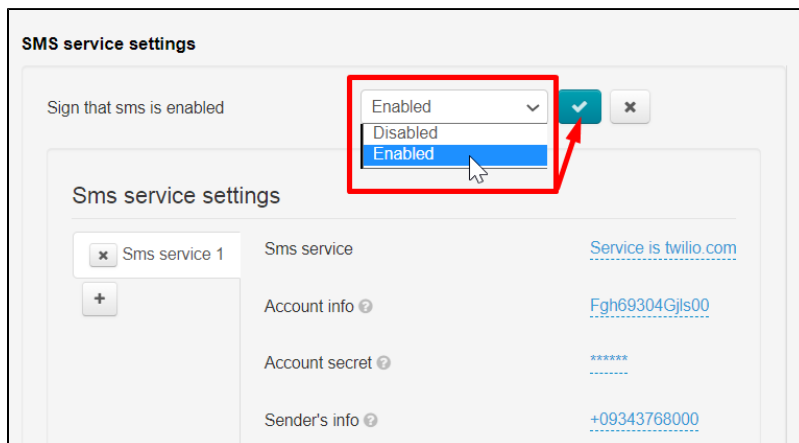

Open Configuration Letters templates section

We are interested in those templates that have **(SMS)** at the end

You must enable the use of SMS services if you do not have such templates (scroll down "Configuration System General" and select "Enabled")

Click necessary template to edit SMS template.

## Letters templates

Cart was abandoned by user (email)	Version	Standard template
<b>Cart was abandoned by user (sms)</b>	Is default template ?	No
Cart is ready to be cleared (email)	Is event enabled ?	Send
Cart is ready to be cleared (sms)		

Interface for editing template will open

Version	<a href="#">Custom template</a>
Is default template ?	No
Is event enabled ?	Send
Text of message	
<div></div>	
In text can be used following placeholders: (WebSite) - Web site url (LastUpdateDate) - Cart last update date (CartItems) - List of items in cart	
Phone number for test message	<input type="text" value="7123456789"/> <a href="#">Test</a>

It's important to remember that 1 **SMS** in Latin can hold up to 160 **characters**.

There are also auxiliary constructs. They are marked red and inserted into the text of SMS when clicked.

Version	<a href="#">Custom template</a>
Is default template ?	No
Is event enabled ?	Send
Text of message	
<div>{WebSite}</div>	
In text can be used following placeholders: (WebSite) - Web site url (LastUpdateDate) - Cart last update date (CartItems) - List of items in cart	
Phone number for test message	<input type="text" value="7123456789"/> <a href="#">Test</a>

This helps to make messages versatile and they are configured to specific recipient.

Write message text and save it clicking "Save" button

Version [Custom template](#)

Is default template [No](#)

Is event enabled [Send](#)

Text of message

Dear customer,  
(LastUpdateDate) you have added some goods to the cart at (WebSite), but hadn't completed your order.

In text can be used following placeholders:  
(WebSite) - Web site url  
(LastUpdateDate) - Cart last update date  
(CartItems) - List of items in cart

Phone number for test message  [Test](#)

It's necessary to customize all message templates in the same way.

We recommend to plan SMS text in text editors for convenience where characters are counted.

## Add / edit customer's phone number

You can add or edit customer's phone number if necessary.

In addition, customer can personally add or change phone number through Personal Account.

## Custom sms service

For custom sms service implementation you need:

1. Account info - "For custom, you need to specify send message url."
2. Account secret - "For custom, you need to specify secret for send message."
