

# Create Facebook Application to set up login

Use the link [https://developers.facebook.com/apps/?show\\_reminder=true](https://developers.facebook.com/apps/?show_reminder=true) to set up and configure application.

Follow the link above to create application, and then click "Create App" which will open the page for creating an application.

A new page will open where you should select "Consumer" in app type and click "Next".

Enter application "Display name" in details window. This name will be displayed at the entrance, then click "Create app".

**Create an App** ✕ Cancel

✔ Type

⌚ **Details**

**Add details**

**Display name**  
This is the app name associated with your app ID. You can change this later.

**App contact email**  
This email address is used to contact you about potential policy violations, app restrictions or steps to recover the app if it's been deleted or compromised.

**Business Account - Optional**  
To access certain permissions or features, apps need to be connected to a Business Account.

By proceeding, you agree to the [Facebook Platform Terms](#) and [Developer Policies](#).

Previous Create app

Application was set up. It is necessary to add "Facebook Login" product which is responsible for entry.

Products list will appear on the screen if you do this immediately after set up. You need to find "Facebook Login" on it and click "Set up". You can get products list by clicking "Add Product" in the left menu wf this is done later. The next steps are similar.

**Certify Compliance with Platform Terms and Developer Policies**

Submit

### Data Use Checkup due by April 12, 2022

Protecting people's privacy is a major priority for Facebook and the developers who build on our platform. That's why we're requiring an annual checkup to make sure your API access and data use comply with Facebook policies. [Learn More](#)

Here's what you need to do before April 12, 2022 to maintain API access and avoid deactivation:

1. Examine your previously approved or added permissions, features and products.
2. Certify your app complies with allowed usage.
3. Certify compliance with the [Facebook Platform Terms](#) and [Developer Policies](#), together with all other applicable terms and policies.

Data Use Checkup is a requirement that must be completed once per year by an app admin.

Get started

Check the box after that and click "Continue".

## Data Use Checkup for demo app

Go Back

Your app is approved for the following permissions, features and products. Please examine the allowed usage for each and certify you're in compliance. Before submitting, you'll also need to certify your compliance with the Facebook Platform Terms and Developer Policies, together with all other applicable terms and policies. [Learn More](#)

For each app owned or operated by a business or entity, you understand and agree that you are certifying on behalf of that business or entity, and you represent and warrant that you have all necessary authority to do so.

### Certify Data Use

To certify, click the box next to each permission or feature before continuing.

#### public\_profile

No API calls in last 30 days

The public\_profile (i.e. Default Public Profile Fields) permission allows your app to read public User fields, such as a user's name and profile picture. The allowed usage for this permission is to authenticate app users and provide them with a personalized in-app experience. This permission is automatically granted to all apps. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

I certify that any use of public\_profile is in compliance with the allowed usage.

### Certify Compliance with Platform Terms and Developer Policies

#### Summary of key sections in Facebook Platform Terms

Here's a quick summary of some key restrictions and requirements that may apply:

- **Prohibited uses and processing of Platform Data (Section 3.a)**  
Restrictions on processing of Platform Data, including restrictions against selling, licensing or purchasing Platform Data, as well as processing it to discriminate against people, make eligibility determinations or for surveillance purposes.
- **Restricted Platform Data (Section 3.b)**  
Restrictions on requesting restricted Platform Data, except as necessary to meaningfully improve user experience in the specific product or service for which someone shared their data.
- **Sharing Platform Data (Section 3.c)**  
Restrictions on sharing Platform Data with third parties.
- **Retention, deletion and accessibility of Platform Data (Section 3.d)**  
Requirements on when Platform Data must be deleted.
- **Providing, maintaining and complying with your Privacy Policy (Section 4)**  
Requirements for the content and accessibility of, and your compliance with, your Privacy Policy.

I certify compliance with the [Facebook Platform Terms](#) and [Developer Policies](#), together with all other applicable terms and policies.
