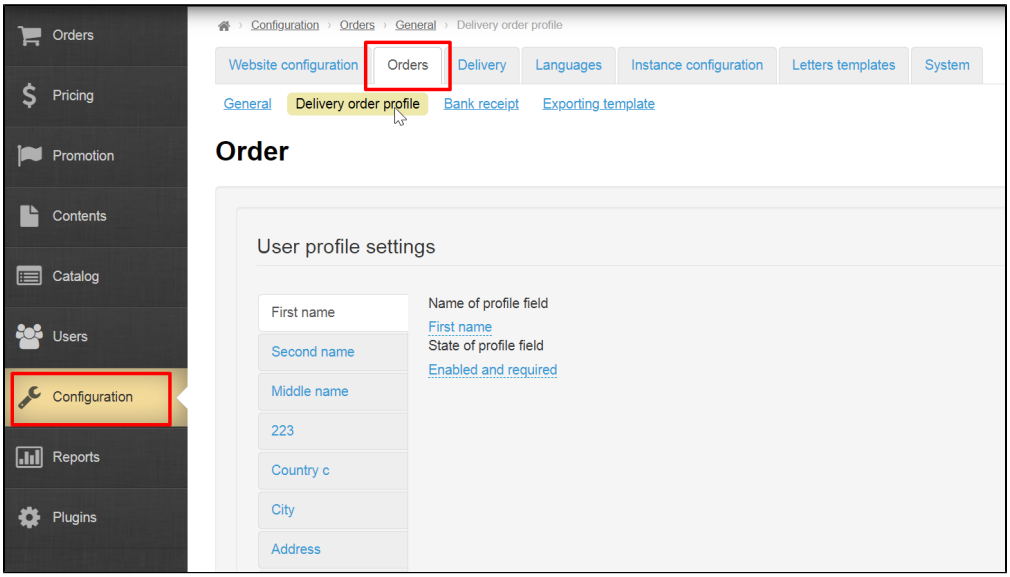
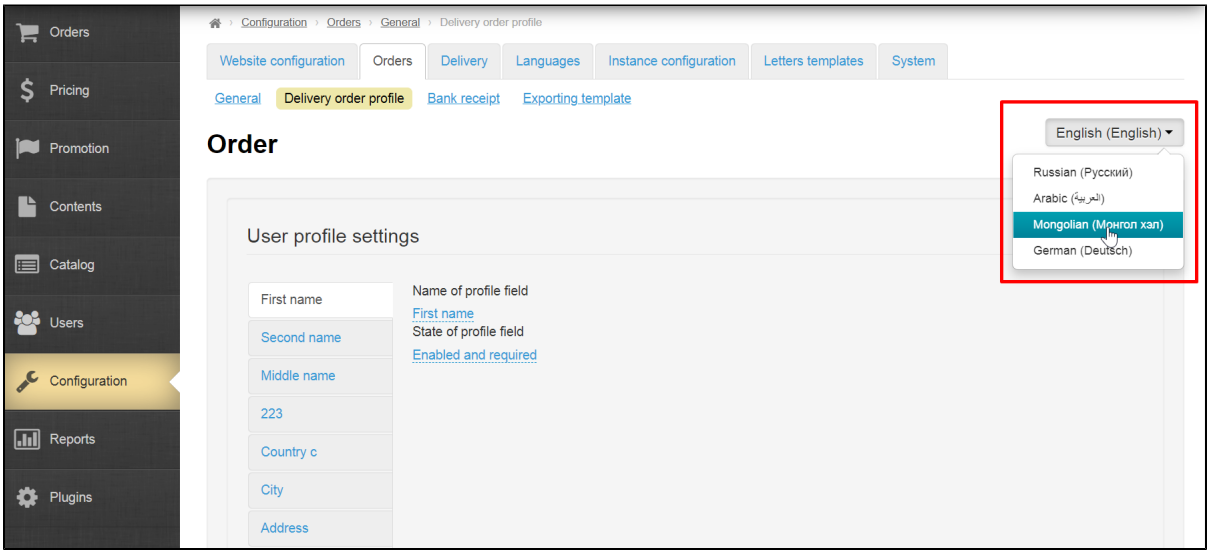
Configuration Orders Delivery order profile

Individual fields can be customized for delivery



Language version

Delivery profile fields can be specified separately for each language version.

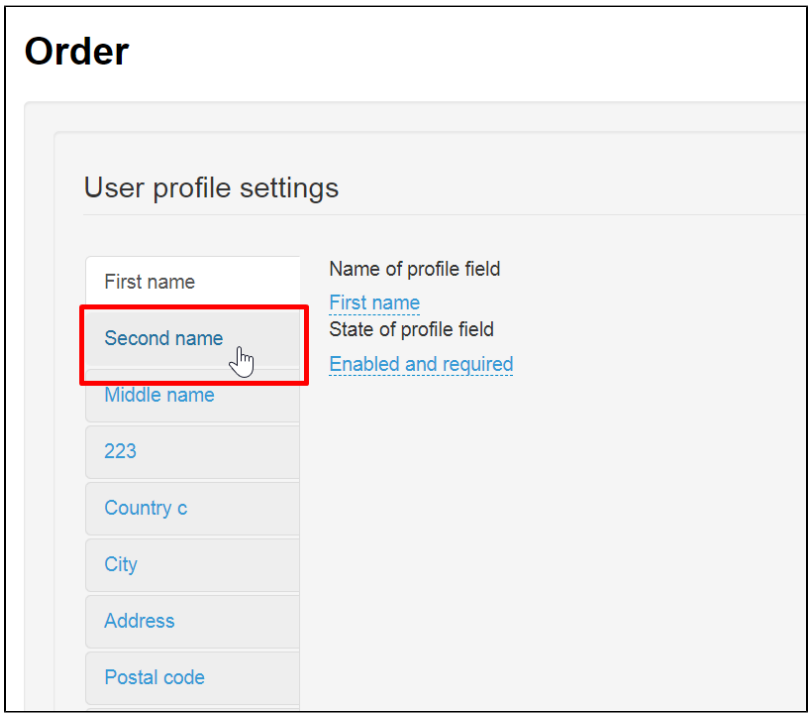


Add

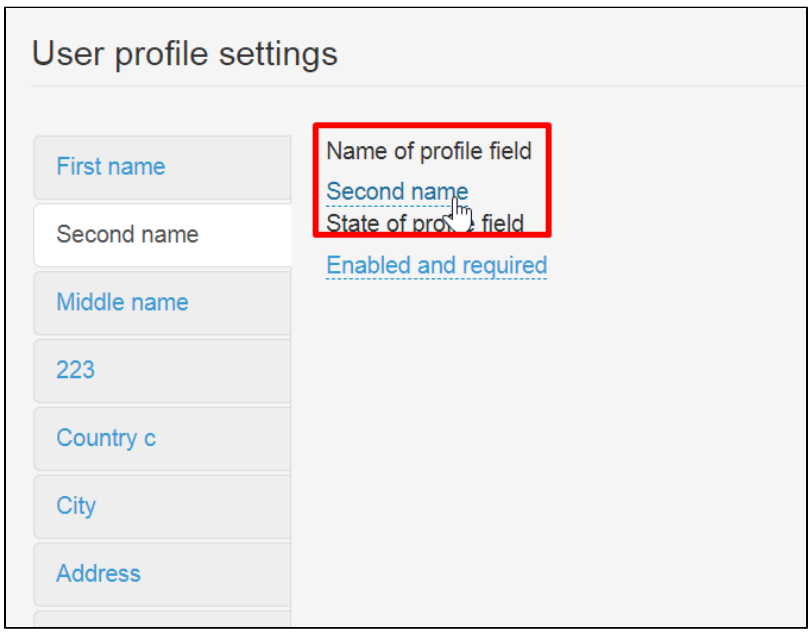
The number of fields set by default: 13.

You can change name and state of each field (disabled, enabled, enabled, and required).

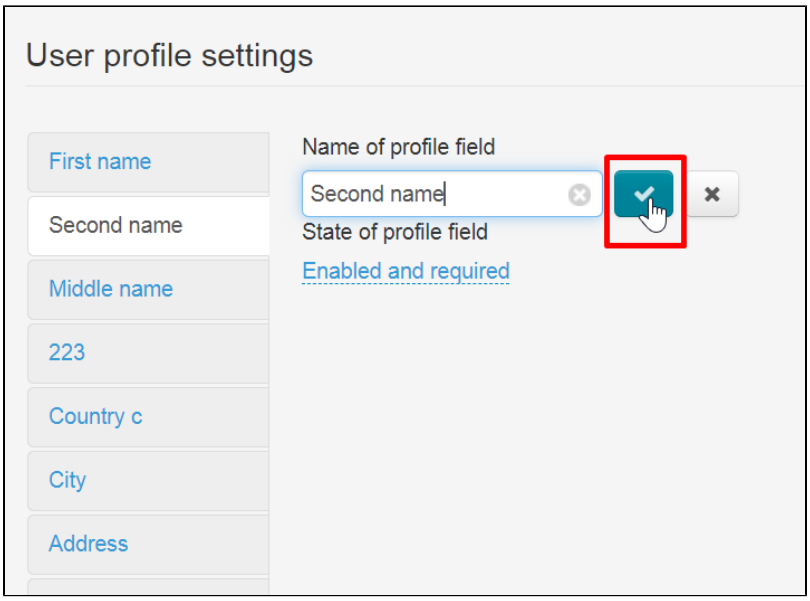
Select the graph on the left to edit



Click "Name of profile field" box to specify name

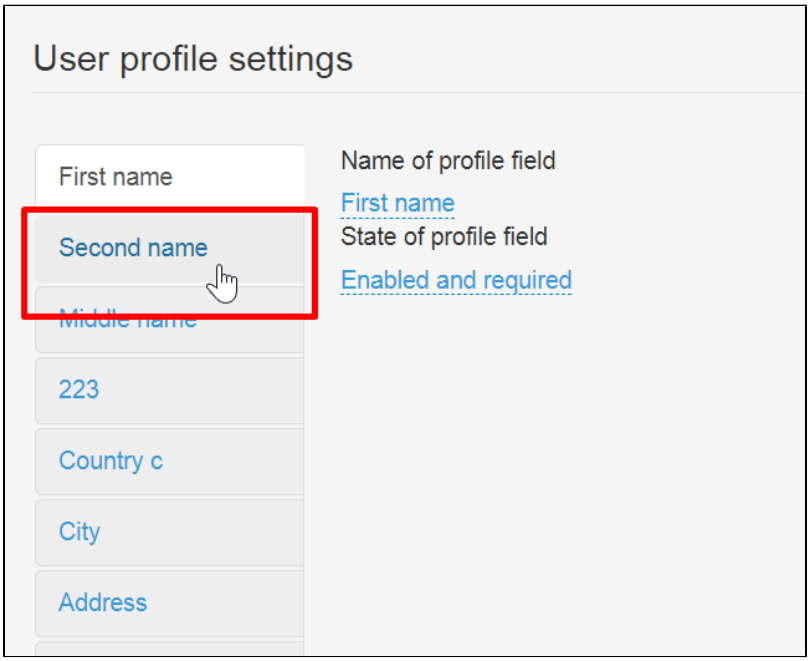


Change field name to necessary one and click checkmark button to save changes.

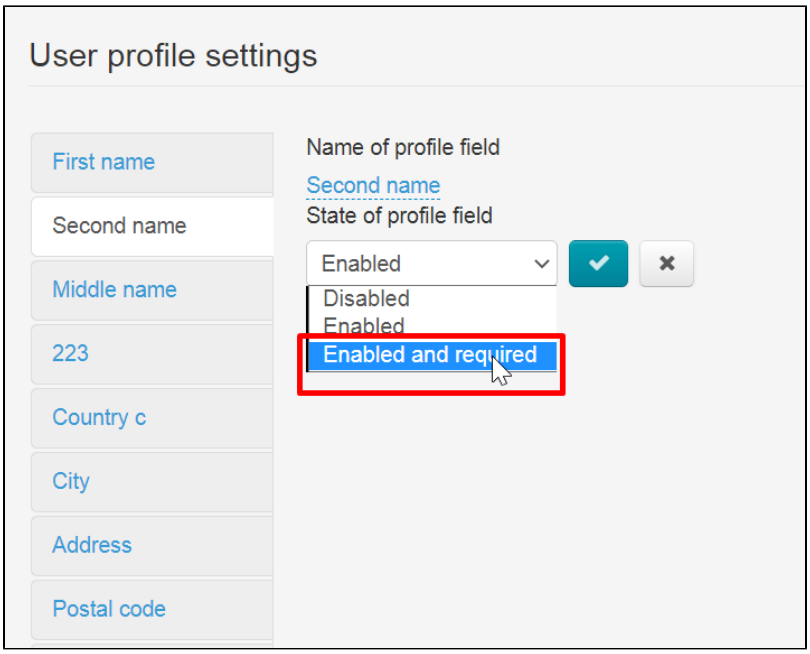


Required field

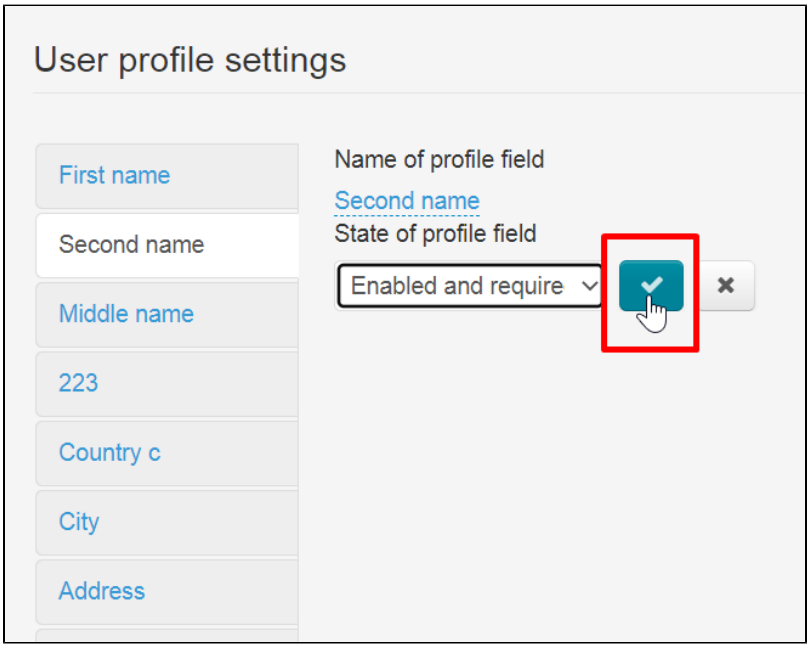
Select a field from the list on the left to make it mandatory



Select "Enabled and required" from drop-down in "State of profile field"

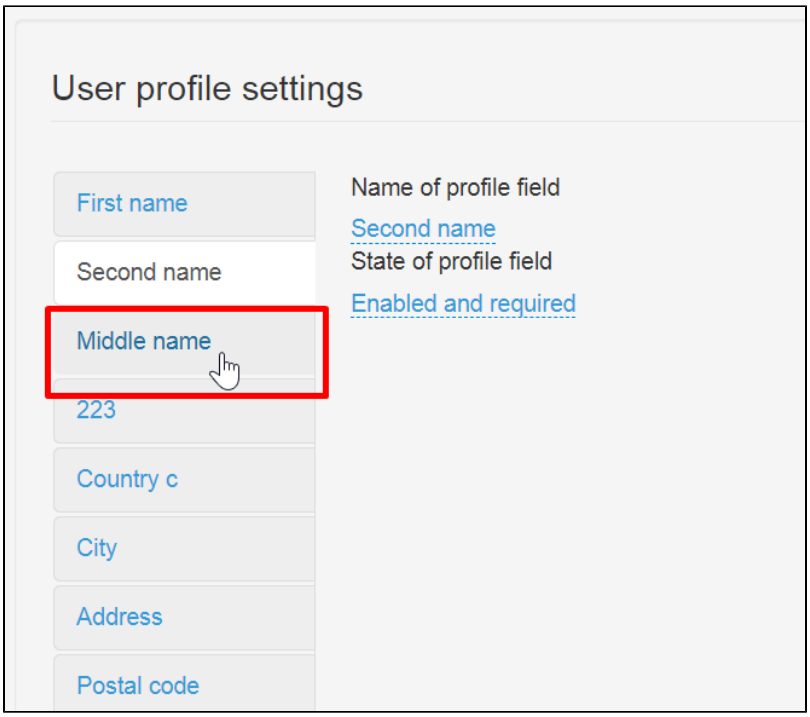


Save choice by tick button



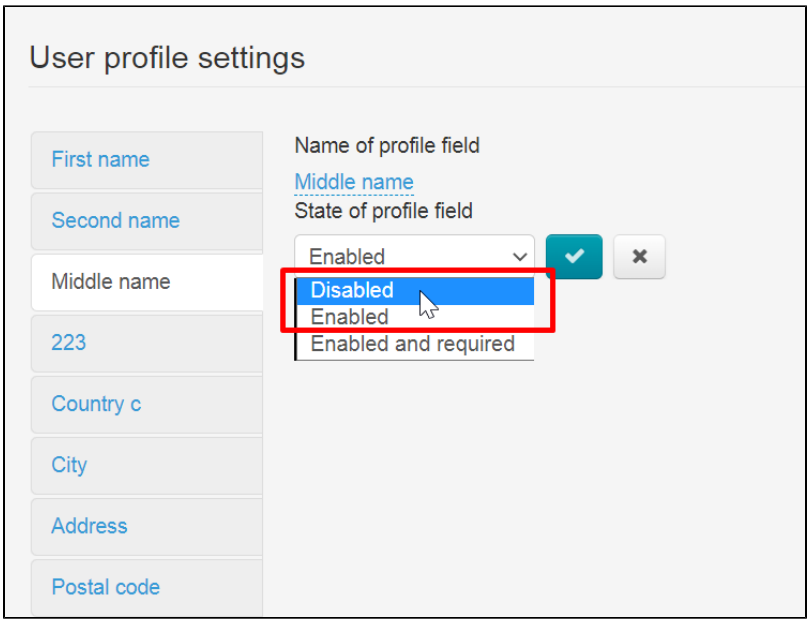
Delete (disable)

It's impossible to delete fields, however, you can turn off fields that you don’t need. Click a field that you don’t need

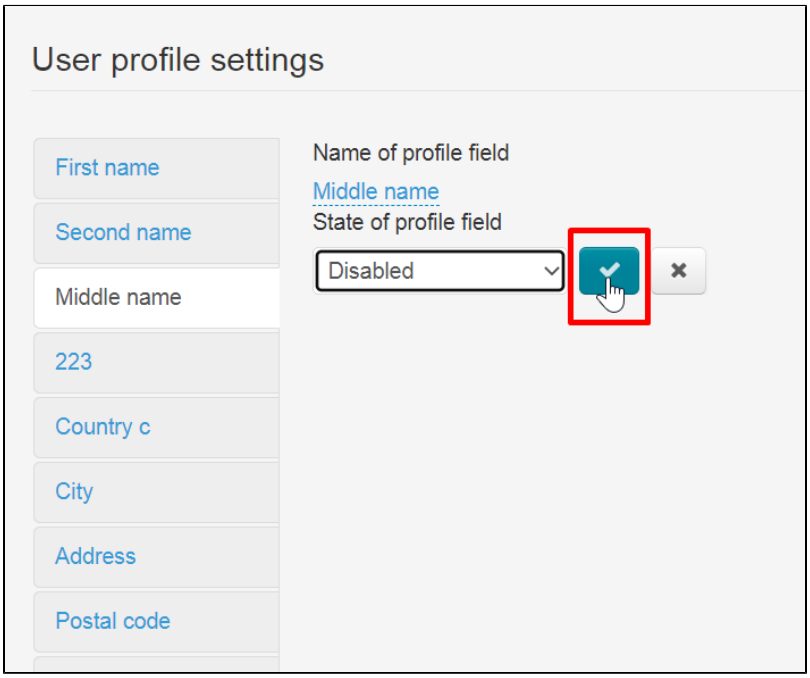


Click "Enabled" in "State of profile field"

Select "Disabled" in drop-down list



Save changes



This field won't be used now and your customers will not see it
